## ACKNOWLEDGEMENT

This study has been accomplished with the help of the thesis advisory committee, from whom I continuously learn, and all staff of Department of Pharmacology for their instructions and supports throughout my graduate study.

I wish to express my sincere gratitude and deep appreciation to Assoc. Prof. Dr. Ampai Panthong, the chairman of the thesis advisory committee for my thesis work, for her valuable guidance on research plan, advice and encouragement, which has enabled me to carry on my graduate work successfully.

I sincere gratefulness to Assoc. Prof. Dr. Duangta Kanjanapothi, Asst. Prof. Dr. Tawat Taesotikul and Assoc. Prof. Dr. Nirush Lertprasertsuke for a valuable help and guidance for this thesis.

I would like to express my deepest gratitude to my program advisor, Asst. Prof. Dr. Noppamas Rojanasthien, for her encouragement throughout the period of this study.

I am also grateful to Dr. Chaoyong Rujjanawate and staffs at the Laboratory of Natural products, Chulabhorn Research Institute at Chiang Mai University, who assisted in many of laboratory studies.

I owe special gratitude to Prof. Dr. Vichai Reutrakul, Department of Chemistry, Faculty of Science, Mahidol University, who provided all animals and the *Diospyros variegata* hexane extract used in this research.

I also would like to thank my friends for their help and encouragement during educational experience.

And finally, I am sincerely grateful to my family for their love and financial support during my education and appreciate many sacrificed animals used in this study.

Natthawan Suwan
