ACKNOWLEDGEMENTS

I would like to express my deepest gratitude to my chief advisor, Assoc. Prof. Dr. Ampai Panthong. This thesis could not have been completed without the excellent instruction, guidance, encouragement and constructive criticism of her.

I am most grateful to my teachers in Department of Pharmacology, Faculty of Medicine, Chaing Mai University, especially Assoc. Prof. Dr. Duangta Kanjanapothi, for their devotion, enthusiastic teaching and suggestions during this research. I am especially indebted to Asst. Prof. Dr. Tawat Taesotikul, for teaching me an analytical and statistical approach to my studies, and also kindly support of my research efforts.

I owe special gratitude to Prof. Dr. Vichai Reutrakul from the Department of Chemistry, Faculty of Science, Mahidol University, for preparation of the plant extract and supply of animals used in this research.

My thanks must be given to Prof. Dr. Tawatchai Santisuk from the Department of Forestry Herbarium for kindly supply of the plant material.

Also my thanks are extended to the staff of the Department of Pharmacology, Faculty of Medicine, Chiang Mai University, for their advice and assistance.

Finally, I gratefully appreciate the staff of the scientists and researchers of various works whose names are listed in the part of references who have given me ideas and inspiration for this work.

THITIKARN WONGCOME
