ACKNOWLEDGEMENT

I would like to express my deep gratitude and sincere appreciation to Asst. Prof. Dr. Busyamas chewaskolyong, my advisor, for her valuable instruction, advice, helpful guidance, criticism and kindness which has enable me to carry out the study successfully. I am greatly indebted to Assoc. Prof. Dr. Viboon Rattanapanone, Assoc. Prof. Nantaya Chanarat and Dr. Apisate Pleumsamran, my co-advisors, for offering and opportunity to perform this research, as well as valuable suggestions for the study.

Sincere appreciation and gratitude are also express to Asst. Prof. Dr. Noppamas Rojanasthien, the thesis examining committee, for their magnificent comments and the correction of this thesis.

I am thankful to Mr. Taweesak Auksorntub, Department of Clinical Chemistry, Faculty of Associated Medical Sciences for his kindness and suggestion for blood analysis.

I would also like to extend my appreciation to my friends and the staff of Physiology Department for their help and friendship.

I am thankful to Miss Preeyalak Rodkaew, my best friend, for her help and encouragement throughout the study.

Special thanks are expressed to all volunteers for their help and participation as subjects in this study.

This study was supported by the Faculty of Medicine Endowment Found for Medical Research. Therefore, The author would like to express sincerely thanks for valuable support here.

Finally, my infinite thanks are expressed to my family for their perfect understanding, constant support, and encouragement throughout my life.

Chanokporn Sukontachaya
