ACKNOWLEDGEMENT

I wish to express the gratitude and deepest appreciation to all those who contributed to the realization of this thesis. Firstly, I wish to gratefully acknowledge to my thesis advisor, Dr. Udompun Khansuwan for his precious guidance, valuable advice and knowledgeable comments through this study. This thesis could not have accomplished without his understanding and kindness encouragement.

Special appreciation is extended to co-advisor, Dr. Anchalee Pongchaidaecha, department of Physiology, faculty of medicine for her precious guidance and knowledgeable comments through this study.

Grateful acknowledgement is extended to the examining committee members for their valuable advice and suggestions were greatly helpful in completing this thesis.

The gratitude is extended to Ajarn Charuwan Parthomthanapongs, department of Pediatrics, faculty of medicine for her kindly support in blood gas analysis.

I would like to extend my thanks to all staff member of the department of Biochemistry, faculty of medicine. Their teaching and suggestion during the course work were very helpful for the understanding of thesis.

The success of this thesis was supported by the grant from faculty of Medicine Endowment Fund for Medical Research. Therefore, the author would like to express sincere thank for invaluable support here.

Finally, The author really appreciates my family for their understanding, kindness encouragement and support that inspired me to reach the goal. Also, I will keep in mind for the love and care that received from various other people whom I did not mentioned here.

Plernpit Yasin.
