## ACKNOWLEDGEMENT

I would like to express my sincere gratitude and deep appreciation to my supervisor, Prof.Dr.Karl Hans Zessin, for his supervision and guidance throughout this research study and publication as well. Without his interest and kindness, this thesis would not have successfully completed.

My deep appreciation is for Asst.Prof.Dr.Lertrak Srikitjakarn, my general adviser, and head of Food Animal Clinic, Faculty of Veterinary Medicine, for his support and encouragement.

I would like to sincere thank Assoc.Prof.Prasit Tharavichitkul, deputy head of Department of Microbiology, Faculty of Medicine, for his comments and suggestions.

Many thanks are also given to all laboratory staffs and technicians of Swine Diseases Diagnostic Center TIHO Hanover; Department of Veterinary Microbiology, Free Berlin University; Central Laboratory, Diagnostic Center, Faculty of Veterinary Medicine, Chiang Mai University for their assistance in my experiments.

Finally, I am grateful to my parent for their support and dedication throughout my life.
