LIST OF FIGURES	xi
ABBREVIATIONS	xii
INTRODUCTION	
Epidemiology	1
Pathogenesis	1
Factors and their roles in peptic ulcer	4
Physiologic and pharmacological regulation of gastric secretion	7
Drugs for Treatment of Gastric Ulcer	9
Medicinal plants with anti-gastric ulcer activity	13
Background of <i>Croton oblongifolius</i> Roxb.	15
Purposes of the study	19
MATERIALS AND METHODS	
Compound	20
Laboratory animals	20
Assessment of anti-gastric activity study	
Preparation of rats for anti-gastric ulcer activity study	20
Methods used to induced gastric ulcer lesions	
EtOH/HCl-induced gastric lesions	21
Restraint water immersion stress	
-induced gastric lesions	22
Indomethacin-induced gastric lesions	22

TABLE OF CONTENTS

	PAGE
Evaluation of gastric lesions	24
Pylorus ligation Experiment	25
Gastric-wall mucus determination	27
Hippocratic screening test	29
Drugs and Chemicals	32
Statistical Analysis	32
RESULTS	
Effect of DS4 on EtOH/HCl-induced gastric lesions	33
Effect of DS4 on Restraint water immersion stress-induced gastric lesions	34
Effect of DS4 on Indomethacin-induced gastric lesions	39
Anti-ulcer activity of DS4 when evaluated in different experimental models.	39
Potency of DS4: Comparison between oral and intraperitoneal administration	42
Pylorus ligation experiment	44
Effect of DS4 on gastric-wall mucus of EtOH/HCl treated rats	46
Hippocratic screening of DS4	48
DISCUSSION	49
REFERENCES	55
VITA	63

LIST OF TABLES

TABLE	PAGE
1. Effect of DS4 (λ -7,12(<i>E</i>)-14-triene-17-oic acid), on EtOH/HCl-induced gastric lesions	
a. intraperitoneal administration	35
b. oral administration	36
2. Effect of DS4 (λ -7,12(<i>E</i>)-14-triene-17-oic acid), on restraint water immersion stress-induced gastric lesions	
a. intraperitoneal administration	37
b. oral administration	38
3. Effect of DS4 (λ -7,12(<i>E</i>)-14-triene-17-oic acid), on indomethacin-induced gastric lesions	40
4. Comparison of potency of DS4 in the administration of oral and intraperitoneal in EtOH/HCl- and restraint water immersion stress-induced gastric lesions in rats	43
5. Effect of DS4 (λ -7,12(<i>E</i>)-14-triene-17-oic acid), on gastric acid secretion in pylorus-ligated rats	45
6. Effect of DS4 (λ -7,12(<i>E</i>)-14-triene-17-oic acid), on gastric-wall mucus in rats with EtOH/HCl	47

LIST OF FIGURES

FIGURE	PAGE
1. Diagram of aggravation causes of, and defense mechanisms against, peptic ulcer	3
2. Physiological and pharmacological regulation of gastric secretion: the basis for therapy of peptic ulcer	8
2. <i>Croton oblongifolius</i> Roxb. Family Euphorbiaceae	16
3. Structures of labda-7,12(<i>E</i>),14-triene-17-oic acid (DS4), a labdane diterpenoid from <i>Croton oblongifolius</i> Roxb.	18
4. Diagram illustrating the procedure of anti-gastric ulcer test in rats	23
5. Diagram illustrating the procedure of pylorus ligation in rat experiment	26
6. Diagram illustrating the procedure of gastric-wall mucus determination	28
7. Standard curve of concentration absorbance of alcian blue solution	30
8. The standard working sheet for hippocratic screening	31
9. Anti-ulcer activity of DS4 when evaluated in difference model	41
