ACKNOWLEDGEMENT

I am deeply indebted to Assoc. Prof. Dr. Ampai Pantong, my advisor, for her excellent instruction, guidance, encouragement and constructive criticism which enabled me to carry out my study successfully.

Special thanks are due to Assoc. Prof. Dr. Duangta Kanjanapothi, Asst. Prof. Dr. Tawat Taesotikul and Assoc. Prof. Dr. Nirush Lertprasertsuke for valuable help and guidance for this thesis.

Deep appreciation is especially extended to Dr. Chaiyong Rujjanawate and other staff at the Laboratory of Natural Products, Chulabhorn Research Institute at Chiang Mai University, who assisted in many of the laboratory studies.

I gratefully appreciate Prof. Dr. Vichai Reutrakul, Department of Chemistry, Faculty of Science, Mahidol University, who gave financial aid for all animals used and also provided the pyranonaphthoquinone compound from *Ventilago harmandiana* Pierre used in this research.

I am also grateful to my friends for who assisted in many of laboratory studies.

Seehanat Thanaporn
