ACKNOWLEDGEMENTS

I would like to express a great deal of gratitude to Professor Dr. Tawee Tunkasiri, my dissertation advisor, for his guidance, persistence and encouragement throughout all my graduate studies. I am also grateful especially to Professor Dr. Prasit Charoenkwan for his kindness, valuable suggestion, thesis discussions and planning the doctoral program study.

Also I would like to thank Associate Professor Dr. Jerapong Tontragoon and Associate Professor Dr. Narin Sirikulrat for their helpful ideas and valuable suggestions throughout this study. I would also like to thank my examining committee members for their useful suggestions.

Furthermore, I would like to express my sincere thanks to the National Metal and Materials Technology Center of Thailand for funding of this project and the Department of Physics, Chiang Mai University, for supporting all my studies.

Finally, I would like to express special thanks to my family, relatives and friends, whose love, patience and understanding helped me to success this study.
