

TABLE OF CONTENTS

Acknowledgement	iii
Abstract in Thai	iv
Abstract in English	v
Chapter 1 Introduction	1
Chapter 2 Preliminaries	4
2.1 Stability.....	4
2.2 The Routh-Hurwitz Stability Criterion.....	5
2.3 Terminology.....	14
Chapter 3 Main Results	15
3.1 The Dynamical Systems.....	15
3.2 Controlling Chaos to Equilibrium Points.....	17
3.2.1 Feedback Control Method.....	17
3.2.1.1 Stabilizing The Equilibrium $E_1 = (\beta_1, \beta_2, \gamma)$	19
3.2.1.2 Stabilizing The Equilibrium $E_2 = (-\beta_1, -\beta_2, \gamma)$	20
3.2.1.3 Numerical Simulations.....	21
3.2.2 Bounded Feedback Control Method.....	22
3.2.2.1 Stabilizing The Equilibrium $E_1 = (\beta_1, \beta_2, \gamma)$	22
3.2.2.2 Stabilizing The Equilibrium $E_2 = (-\beta_1, -\beta_2, \gamma)$	24
3.2.2.3 Numerical Simulations.....	26
3.3 Controlling Chaos to limit cycles.....	29
3.3.1 Nonfeedback Control Method.....	29
3.3.1.1 Numerical Simulations.....	30

3.3.2 Delayed Feedback Control Method.....	32
3.3.2.1 Approximated Delay Feedback Method.....	32
3.3.2.2 Numerical Simulations.....	36
Chapter 4 Conclusion	38
Bibliography	40
Vita	41
