ACKNOWLEDGEMENT

I would like to express my thank to my advisor, Assoc.Prof. Totsaporn Chankong. Without her teaching talent and encouragement, this thesis would not have been possible.

My special appreciation is expressed to Assoc.Prof. Patra Techapiwat, Assoc.Prof.Dr. Suthep Suantai and Asst.Prof. Phatara Rojanapaibul for many valuable comments and helpful suggestions. I also wish to thank for other lecturers for their valuable lectures during my study at the department, especially Dr. Natee Tongsiri for his support with software MAPLE.

I gratefully appreciate my beloved family for their love, sacrifices, and support.

Finally, I would like to express my special thanks to my friends for their suggestion and encouragement.

Supaporn Suksern
