ACKNOWLEDGEMENT	iii
ABSTRACT	iv
LIST OF TABLES	x
LIST OF ILLUSTRATIONS	xi
ABBREVIATION	xiv
CHAPTER 1 INTRODUCTION	1
1.1 Comparative anatomy of prostate gland	1
1.2 Gross anatomy of rat prostate gland	5
1.3 Histology of prostate gland	6
1.4 Glycoconjugates and Lectins	8
1.5 Literature review	11
1.6 Hypothesis	14
1.7 Objective	14
CHAPTER 2 RESEARCH DESIGNS AND METHODS	15
2.1 Animals	15
2.2 Tissue preparation	15
2.3 Section preparation	16
2.4 Tissue staining	16

2.5	Data collection	18
2.6	Evaluation of lectin staining	20
CHAPTER 3 RESULTS		21
3.1	Lectin staining intensity in the ventral prostate	22
3.2	Lectin staining intensity in the dorsal prostate	28
3.3	Lectin staining intensity in the lateral prostate	33
3.4	Lectin staining intensity in the anterior prostate	38
CHAPTER 4 DISCUSSION		43
4.1	The glycoconjugates of ventral prostate	43
4.2	The glycoconjugates of dorsal prostate	44
4.3	The glycoconjugates of lateral prostate	45
4.4	The glycoconjugates of anterior prostate	46
4.5	Pattern of glycoconjugates synthesis in various age group	47
4.6	Application of the knowledge to the human understandings	48
CHAPTER 5 CONCLUSION		54
REFERENCES		56
APPENDIX		60
CURRICULUM VITAE		66

LIST OF TABLES

TABLE		PAGE
1.	List of lectins used in this study and their binding specificity	18
2.	A comparison of the lectin staining intensity in secretory epithelial cells of prostatic acini in the ventral prostate lobe among age groups.	22
3.	A comparison of the lectin staining intensity in secretory epithelial cells of prostatic acini in the dorsal prostate lobe among age groups.	28
4.	A comparison of the lectin staining intensity in secretory epithelial cells of prostatic acini in the lateral prostate lobe among age groups.	33
5.	A comparison of the lectin staining intensity in secretory epithelial cells of prostatic acini in the anterior prostate lobe among age groups.	38

LIST OF ILLUSTRATIONS

FIGURE	PAGE
1. Diagram of the prostate in the male opossum	2
2. Diagram of the primate prostate from 3 different views.	3
3. Prostate in <i>Cebus capucinus</i> .	3
4. Prostate in <i>Cercopithecus ascanius ascanium</i> .	3
5. Diagram of the male pelvic organs of the rat	5
6. Diagram of the lateral view of the rat male pelvic organ.	6
7. Histology of rat prostate gland. (Magnification x 50)	7
8. Histology of rat prostate gland (Magnification x 400)	7
9. The McDonald's modification of Lascano's technique. staining showing Golgi apparatus zone in rat prostate gland.	10
10. Diagram showing the embedding orientation in a tissue block.	16
11. Diagram showing the palette of gray scale and its range of pixel values.	19
12. The scale bar showing four score intervals to grade the lectin staining intensity.	20
13. Histogram showing the patterns of the lectin staining intensity in the ventral prostate glands among age groups.	23

14.	The staining patterns of lectins at the rER-Golgi region of V2w and their reactivity grades.	24
15.	The staining patterns of lectins at the rER-Golgi region of V1m and their reactivity grades.	25
16.	The staining patterns of lectins at the rER-Golgi region of V3m and their reactivity grades.	26
17.	The staining patterns of lectins at the rER-Golgi region of V14m and their reactivity grades.	27
18.	Histogram showing the patterns of the lectin staining intensity in the dorsal prostate glands among age groups.	29
19.	The staining patterns of lectins at the rER-Golgi region of D1m and their reactivity grades.	30
20.	The staining patterns of lectins at the rER-Golgi region of D3m and their reactivity grades.	31
21.	The staining patterns of lectins at the rER-Golgi region of D14m and their reactivity grades.	32
22.	Histogram showing the patterns of the lectin staining intensity in the dorsal prostate glands among age groups.	34
23.	The staining patterns of lectins at the rER-Golgi region of L1m and their reactivity grades.	35
24.	The staining patterns of lectins at the rER-Golgi region of L3m and their reactivity grades.	36

25.	The staining patterns of lectins at the rER-Golgi region of L14m and their reactivity grades.	37
26.	Histogram showing the patterns of the lectin staining intensity in the dorsal prostate glands among age groups.	39
27.	The staining patterns of lectins at the rER-Golgi region of A1m and their reactivity grades.	40
28.	The staining patterns of lectins at the rER-Golgi region of A3m and their reactivity grades.	41
29.	The staining patterns of lectins at the rER-Golgi region of A14m and their reactivity grades.	42
30.	Diagram of the distribution of lectin binding reaction (moderate to strong) in different lobes of the prostate gland of the rat at various ages.	49
31.	Comparison of Con A staining in the ventral prostate among age groups.	50
32.	Comparison of PNA staining in the ventral prostate among age groups.	50
33.	Comparison of DBA staining in the dorsal prostate among age groups.	51
34.	Comparison of DBA staining in the lateral prostate among age groups.	52
35.	Comparison of Con A staining in the anterior prostate among age groups.	53

ABBREVIATION

ANOVA	analysis of variance
A1m	anterior prostate of 1 month-old rat
A3m	anterior prostate of 3 months-old rat
A14m	anterior prostate of 14 months-old rat
D1m	dorsal prostate of 1 month-old rat
D3m	dorsal prostate of 3 months-old rat
D14m	dorsal prostate of 14 months-old rat
L1m	lateral prostate of 1 month-old rat
L3m	lateral prostate of 3 months-old rat
L14m	lateral prostate of 14 months-old rat
V2w	ventral prostate of 2 weeks-old rat
V1m	ventral prostate of 1 month-old rat
V3m	ventral prostate of 3 months-old rat
V14m	ventral prostate of 14 months-old rat
ER	endoplasmic reticulum
H&E	hematoxylin and eosin
rER	rough endoplasmic reticulum
Con A	<i>Canavalia ensiformis</i>
DBA	<i>Dolichos biflorus</i>
MPA	<i>Maclura pomifera</i>

PNA	<i>Arachis hypoalgaea</i> (peanut agglutinin)
PSA	<i>Pisum sativum</i>
UEA-I	<i>Ulex- europaeus</i>
WGA	<i>Triticum vulgare</i> (wheatgerm agglutinin)
