ACKNOWLEDGMENTS

The author would like to express his sincere thanks and appreciation to his supervisor, Dr.Urai Tengjaroenkul, for her invaluable guidance, grateful supervision, continual encouragement, and discussions, also to a co-supervisor, Assistant Professor Dr.Saisunee Liawruangrath, for her comments and guidance.

The author is sincerely grateful to Dr.Ponlayuth Sooksamiti of The Office of Primary Industries and Mines Resources Region 3 (Chiang Mail) for his kind supervision and assistance throughout this research work.

The author would like to acknowledge the “Dr.Bruno Werdelmann Foundation” and the “Postgraduate Education and Research Program in Chemistry (PERCH)” for supplying the graduate scholarship grants which enabled this work to be carried out.

The author would like to thank those whose names are not listed here and those who have one way or another contributed to the success of this work. Finally, the author is profoundly grateful to his family for their tender love, continual care, and encouragement during his study in the M.S. program.
