ACKNOWLEDGEMENTS

The author wishes to express her sincere thanks and profound appreciation to her supervisor, Asst. Prof. Dr. Sugunya Wongpornchai, for her invaluable guidance, kind supervision and constant encouragement throughout this research work. The author also would like to extend her sincere thanks to the following:

To Dr. Sunanta Wongkarn and Dr. Winai Oungpipat, for their helpful guidance and constant encouragement.

To Mr. Pisan Kitsawatpaiboon, for his kind and admirable service throughout this research work.

To Miss Nattawan Kuppithayanant and Miss Arunee Danudol, for their help and guidance in the laboratory.

To Mr. Kiattisak Chat-arrayavadee, Miss Kanlaya Jumpatong and all of the author's friends at Chiang Mai University for their help and encouragement in the laboratory and during the thesis preparation.

To the Chemistry Department and the Central Library of Chiang Mai University, for the provision of laboratory and library facilities which have made this study possible.

To the Postgraduate Education and Research Program in Chemistry (PERCH) of the Thai Ministry of University Affairs for the partial scholarship and financial support.

Finally, the author wishes to show her heartfelt gratitude to her parents, aunt and brother, for their tender love, continuous care and endless encouragement.

Wantanee Srisuwan
