

**DEVELOPMENT OF FLOW INJECTION ANALYSIS METHOD
FOR SPECIATION OF SELENIUM IN WATER SAMPLES**

The seal of Chiang Mai University is a circular emblem. It features a central illustration of an elephant standing and facing left, with a sunburst or flame-like symbol above its head. The Thai text "มหาวิทยาลัยเชียงใหม่" (Mahavithayalai Chiang Mai) is written in a circular path around the top half of the seal. The English text "CHIANG MAI UNIVERSITY" is written along the bottom half, with the year "1964" at the bottom right. Two decorative floral motifs are positioned on the left and right sides of the seal.

ACKNOWLEDGEMENTS

The author would like to express her gratitude and appreciation to her supervisor, Asst. Prof. Dr. Saisunee Liawruangrath for her kind supervision and guidance throughout this research work, and the author would like to express her sincere thanks to Assoc. Prof. Dr. Boonsom Liawruangrath and Dr. Sunanta Wangkarn for their useful advices.

The author would like to thank Postgraduate Education and Research Program in Chemistry of National Science and Technology Development Agency (NSTDA) and Postgraduate Education and Research in Chemistry Program (PERCH) for their helps received in support of this study.

The author would like to extend her sincere thanks to FIA research group at Chiang Mai University for the help and suggestion throughout this research and the Chemistry Department of Chiang Mai University for laboratory facilities throughout this work.

The author would like to thank those whose names are not listed here, who have one way or another contributed to the success of this study.

Finally, the author would like to express her deepest gratitude to her family and friends for encouragement throughout this research work.
