## ACKNOWLEDGEMENTS

The author would like to express sincere thanks and appreciation to her supervisor, Assoc. Prof. Dr. Surasak Watanesk, for his invaluable guidance, grateful supervision, continual encouragement and discussions.

The author wish to acknowledge the Postgraduate Education and Research Program in Chemistry (PERCH) for providing the graduate scholarship grants which enable this work to be carried out.

The author likes to thank also those whose names are not listed here and those who have one way or another contributed to the success of this work. Finally, the author is profoundly grateful to her family for their tender love, continual care, and encouragement during study in the M.S. program.

Watcharee Saipanya
