ACKNOWLEDGEMENTS

The author would like to express his deeply gratitude and appreciation to Dr. Jaroon Jakmune, for his kind supervision, invaluable guidance, continual encouragement. The author would like to express his sincere thanks and appreciation to Dr. Supaporn Kradtap, Assoc. Prof. Dr. Kate Grudpan and Dr. Somchai Lapanantnoppakhun for their kind valuable discussion, encouragement and assistance given until throughout this research work.

The “Postgraduate Education and Research in Chemistry Program (PERCH)”, “Dr. Bruno Werdelmann Foundation” and partial support “The Thailand Research Fund (TRF)” are acknowledged for the scholarship granted to the author.

The author is profoundly grateful to his family for their tender love, continual care and encouragement during his study in the M.S. program. Finally, the author would like to thank all of his friends in Flow Based Analysis group (FBA) at the Department of Chemistry, Faculty of Science, Chiang Mai University for giving opportunity and laboratory facilities and also thank many people whose names are not listed here who have contributed to the success of this work one way or another.
