ACKNOWLEDGMENTS

This research successfully ended up with numerous helps from many people and institutes. The first grateful thank I give to my four helpful supervisors namely Assoc. Prof. Dr. Benjavun Ratanasthien, Assoc. Prof. Dr. Sampan Singharajwarapan, Dr. Wittaya Kandharosa from the Chiang Mai University, and Dr. Dallas Mildenhall from the Institute of Geological and Nuclear Sciences (IGNS), New Zealand. At the same priority, I thank though the Royal Golden Jubilee Ph.D. Program, the Thailand Research Fund (TRF) for a financial support throughout this research.

I thank the Department of Mineral Resources, my workplace, for additional financial support particularly logistic support and palynology laboratory. In addition, I express my appreciation to the IGNS. The six months stay in New Zealand was encouraging and fruitful through the use of many facilities at IGNS especially numerous useful reference materials. I will never forget the generous and cozy people from the IGNS. This also includes Dr. Mildenhall's wife, Mrs. Esme Mildenhall, for her warm hospitality.

This research could not be achieved without helps from coal mine staff including Electricity Generating Authority of Thailand (Mae Moh Mine), Chiang Muan Mine Company Limited (Chiang Muan Mine), Lanna Resources PCL. (Ban Pa Kha Mine), Ban Pu PCL. (Ban Pu Mine), Taan (Thailand) Company Limited (Na Sai Mine), Laemthong Lignite Company Limited (Na Hong Mine), and Suje Company Limited (Mae Lamao Mine). I gratefully thank all the people of the coal mine companies.

I thank some helpful Ph.D. students from Chiang Mai University, including Mr. Thanuchai Silaratana, Ms. Bantita Udomkan, Ms. Yupa Tasod, and Ms. Ratanaporn

Hunta. They frequently went to the field with me and help collect samples and fossils. Thanks are also extended to the Japanese geologists including Dr. Yutaka Kunimatsu, Prof. Dr. Hideo Nakaya, Dr. Haruo Saegusa, Dr. Atsushi Yabe, and Dr. Shinji Nakaoka.

I received many good things from my family, my wife, my son, and my daughter. I thank my wife who sacrificed her happiness for my success as well as my son and daughter who stimulated my will power to complete this research.

All my success I recall my parent who always waited to see this achievement. I always recall my mother who, unfortunately, passed away while the thesis was still being undertaken.

Finally, I thank many helpful people who I do not mention herein.

Wickanet Songtham
