ACKNOWLEDGEMENTS

I wish to express my deep gratitude and appreciation to my thesis advisor, Associate Professor Dr. Pradya Somboon, Department of Parasitology, Faculty of Medicine, Chiang Mai University, for his kindness, guidance, valuable suggestions, constructive criticism and constant encouragement which enable me to complete my study.

I wish to express my deep gratitude and appreciation to my thesis co-advisor, Associate Professor Wej Choochote, Department of Parasitology, Faculty of Medicine, Chiang Mai University, for his kindness, valuable guidance, meaningful criticism and help during the study.

I would like to thank Dr. Catherine Walton, School of Biology, University of Leeds, England, for her help in sequencing DNA of mosquitoes.

I would like to thank Dr. Wannapa Suwonkerd, Office of Diseases Prevention and Control 10, Department of Diseases Control, Ministry of Public Health, Chiang Mai, Thailand, for serving as my external examiner.

Sincere appreciation to Naresuan University especially Faculty of Medical Science for the valuable education opportunity and valuable guidance. Scholarship under the Ministry Staff Development Project of the Ministry of University Affairs, for financial support throughout my graduated study at Chiang Mai University is also acknowledged.

Certainly, I cannot forget my best friends, Miss Anuluck Junkum, Miss Noppawan Boonchu and other friends at Department of Parasitology, Faculty of Medicine, Chiang Mai University, for their helps and encouragement.

Finally, I wish to express all my deepest gratitude to my beloved mother, father and brother for their encouragement and give moral support throughout my study.
