ACKNOWLEDGEMENT

I would like to express my deepest gratitude to my chief advisor, Assoc. Prof. Dr. Ampai Panthong. This thesis could not have been completed without the excellent instruction, guidance, encouragement and construction criticism of her.

I am indebted to many of my teachers in Department of Pharmacology, Faculty of Medicine, Chiang Mai University, for their devotion and enthusiastic teaching, which were instrument in promoting my educational and ethical development. I am especially grateful to Asst. Prof. Dr. Tawat Taesotikul, for teaching me an analytical and statistical approach to my studies, and also for kindly supporting of my research efforts.

I owe special gratitude to Prof. Dr. Vichai Reutrakul, Department of Chemistry, Faculty of Science, Mahidol University, who supported all animals and plant material in the research.

My thanks are extened to the staff of the Department of Pharmacology, Faculty of Medicine, Chaing Mai, University, for their advice and assistance.

I also would like to thank my friends for their help and encouragement during my educational experience.

And finally, I am sincerely grateful to my family for their love and financial support during my education and appreciate many sacrificed animals used in this study.

Pinpaka Norkaew
