ACKNOWLEDGEMENT	III
ABSTRACT	IV
TABLE OF CONTENT	IX
LIST OF TABLE	XIII
LIST OF ILLUSTRATIONS	XIV
ABBREVIATIONS	XVI
CHAPTER 1 INTRODUCTION	1
A. General background	1
B. General characteristics of White Kwao	4
C. Components of White Kwao	8
D. The effect of pharmacological of White Kwao	13
1. Estrogenic effects	13
1.1 Effect on mammary gland and lactation on lactating animals	13
1.2 Effect on reproductive organs of animals	13
1.3 Antifertility effects	14
2. Change of calcium, total protein and cholesterol concentration in blood	15
3. Immunogenic effect	16
E. Development of the preimplantation embryos	16

F. The effect of estrogen on embryo development	18
G. Principle, models, rationale, or hypothesis	20
H. Objective	20
I. Usefulness	21
<b>CHAPTER 2 RESEARCH DESIGNS AND METHODS</b>	<b>22</b>
A. Research designs	22
B. Experimental animals	25
C. Preparation of Lyophilized White Kwao	25
D. Preparation of Media	26
D1. Embryo collecting and washing medium	26
D2. Embryo culture medium	26
D2.1 Preparation of M16 medium containing lyophilized White Kwao	26
D2.2 Preparation of M16 medium containing ethinlyestadiol-17 $\beta$	27
D3. Setting Up Microdrop culture	29
E. The study of the effect of White Kwao extract on <i>in vitro</i> development of preimplantation of mouse embryo	29
F. Differential labeling of inner cell mass and trophectoderm nuclei of mouse blastocysts	33
G. The study of the effect of White Kwao extract on implantation rate of mouse blastocyst	34
G.1 Vasectomy of male mice for preparation of	

pseudopregnancy	34
G.2 Transfer of blastocysts into the uterine of pseudopregnant recipients	34
H. Statistical Analysis	35
CHAPTER 3 RESULTS	36
A. Electrochemiluminescent immunoassay of estradiol levels in medium	36
B. Effect of White Kwao extract on <i>in vitro</i> development of preimplantation mouse embryo	38
C. Differential labeling of inner cells mass and trophectoderm nuclei	39
D. Effect of White Kwao extract on implantation rate of mouse blastocysts	44
CHAPTER 4 DISCUSSION	53
A. Effect of White Kwao extraction on <i>in vitro</i> development of preimplantation mouse embryo	53
B Effect of White Kwao on the number of cells allocate into the inner cell mass (ICM) and trophectoderm (TE) of individual blastocyst	56

**LIST OF TABLES**

TABLE	PAGE
1. Estradiol values of M16 containing lyophilized White Kwao extract and ethinylestradiol-17 $\beta$	37
2. Development of mouse embryos from two-cells to Blastocyst in three different media (experiment 1-10)	40
3. The percentage of mouse embryos developed from two-cells stage to blastocyst after they were grown in the three difference media	45
4. A comparison of cell number of trophoctoderm and inner cell mass after they were cultivated in the three difference media for 5days	47
5. A comparison of total cell number of blastocyst after they were cultivated in the three difference media for 5 days	48

## LIST OF ILLUSTRATIONS

FIGURE	PAGE
1. The tuberous root of White Kwao	6
2. The leaves of White Kwao	6
3. The flowers of White Kwao	7
4. The shells of White Kwao	7
5. Structure of miroesterol and deoxymiroesterol	10
6. Structure of flavonoids	11
7. Structure of coumestan	12
8. Summary diagram of the procedure in this research	24
9. The plastic petri-dish containing 50 $\mu$ l-drop of M16	28
10. Female internal reproductive organs	31
11. Procedure of flushing oviducts	32
12. Histogram shows the comparison of the development of the mouse embryos from 4-cells stage to late blastocyst, which they were cultivated the three differece media	46
13. Photomicrograph of representati ve 2-cells stage	49
14. Photomicrograph of representati ve 4-cells stage	49
15. Photomicrograph of representati ve 8-cells stage	50
16. Photomicrograph of representati ve morula stage	50

17. Photomicrograph of representative late blastocyst stage	51
18. Photomicrograph of representative hatch blastocyst stage	51
19. Photomicrograph of representative differential labeling of inner cell mass and trophectoderm	52
20. Photomicrograph of representative the inner cell mass and trophectoderm were stained with propidium iodide and bisbenzimidide	52
21. Procedure for drawing Pasture pipette	73

## ABBREVIATIONS

ANOVA	analysis of variance
CaCl <sub>2</sub>	calcium chloride
CO <sub>2</sub>	carbondioxide
g	gram
KCl	potassium chloride
Kg	kilogram
KH <sub>2</sub> PO <sub>4</sub>	potassium phosphate monobasic
M16	modified Krebs-Ringer bicarbonate
mg	milligram
ml	millilitre
mm	millimetre
mRNA	messenger ribonucleic acid
NaCl	sodium chloride
NaHCO <sub>3</sub>	sodium bicarbonate
Na <sub>2</sub> HPO <sub>4</sub>	disodium phosphat
PI	propidium iodide
pg	picogram
µg	microgram
µl	microlitre
w/v	weight per volume

w/w

weight per weight

$\chi^2$

chi-square
