

TABLE OF CONTENTS

	Page
Acknowledgements	iii
Abstract in Thai	iv
Abstract in English	v
Chapter 1 Introduction	1
Chapter 2 Preliminaries	3
2.1 Distributions.	3
2.1.1 The Space \mathcal{D} of Testing Functions.	3
2.1.2 Distributions.	4
2.1.3 Example of Distributions.	5
2.1.4 Multiplication of Distributions by Infinitely Smooth Function.	6
2.1.5 The Derivative of Distributions.	7
2.1.6 The Convolution Applied to Ordinary Linear Differential Equations with Constant Coefficients.	9
2.2 Periodic Distribution.	11
2.2.1 The Space \mathcal{P}_T of Periodic Testing Functions.	11
2.2.2 The Space \mathcal{P}'_T of Periodic Distribution.	12
2.2.3 T -Convolution.	15
2.2.4 The T -Convolution Algebra	16
2.2.5 The Finite Fourier Transformation	17
2.2.6 The T -Convolution Applied to Ordinary Linear Differential Equations with Constant Coefficients.	19

2.3 Electric Circuit Problems.	21
Chapter 3 Main results	24
3.1 Some Properties of $e^{\alpha t} \delta_T^{(k)}$	24
3.2 The Application of $e^{\alpha t} \delta_T^{(k)}$	27
Chapter 4 Conclusion	32
Bibliography	33
Vita	34
