| <b>Abstract in Thai</b>                           | <b>iv</b>  |
| <b>Abstract in English</b>                        | <b>v</b>   |
| <b>Chapter 1 Introduction</b>                     | <b>1</b>   |
| <b>Chapter 2 Preliminaries</b>                    | <b>3</b>   |
| 2.1 Sequences and Series . . . . .                | 3          |
| 2.2 Metric Spaces and Normed Spaces . . . . .     | 3          |
| 2.3 Matrices and Linear Transformations . . . . . | 5          |
| 2.4 Newton's method . . . . .                     | 5          |
| 2.5 Generalized Inverses of Matrices . . . . .    | 9          |
| 2.6 Gram-Schmidt Orthogonalization . . . . .      | 10         |
| 2.7 Singular Value Decomposition(SVD) . . . . .   | 11         |
| <b>Chapter 3 Main results</b>                     | <b>14</b>  |
| 3.1 Convergence . . . . .                         | 14         |
| 3.2 Implementation . . . . .                      | 20         |
| 3.3 Numerical Experiments . . . . .               | 21         |
| <b>Chapter 4 Conclusion</b>                       | <b>29</b>  |
| <b>Bibliography</b>                               | <b>31</b>  |
| <b>Appendix</b>                                   | <b>32</b>  |
| <b>Vita</b>                                       | <b>41</b>  |
