ACKNOWLEDGEMENTS

The author wishes to express her deepest gratitude and appreciation to Associate Professor Dr. Usanee Vinitketkumnuen for her excellent guidance, valuable advice, and patience. This thesis could not have been accomplished without her generous support and encouragement.

She would like to extend her gracious thanks to the Department of Clinical Chemistry, Faculty of Associate Medical Science, Chiang Mai University for their kindness in the provision the semi-automatic photometer to facilitate her study. The facilities of the Department of Biochemistry, Faculty of Medicine, Chiang Mai University should be obliged. Furthermore, the instructions and teaching during the course work were utilized for understanding of this thesis.

Grateful acknowledgement is extended to Professor Dr. Christopher Wild, The University of Leeds, for his valuable suggestion and donation of anti-AFB₁-lysine antibody and some chemicals for this research.

She would like to sincere thanks to Miss Janya Tipsri, Mr. Teera Chewonarin, Miss Khanitha Punture, Miss Piyawan Bunpo, Mr. Siwapong Tansuwanwong, Miss Rawiwan Pautanachokchai, and Miss Siriporn Panyatheam, for their kindly suggestions and generous help throughout study.

She was very thankful Associate Professor Dr. Porn-ngarm Limtrakul, Dr. Ponthip Wirachwong as well as Dr. Dale E Taneyhill to donate time to read and approve the grammar for her thesis.

Special thanks to her wonderful friends Mr. Keittisak Suwan, Miss. Rujirek Chaiwongsa, Mr.Komsak Pintha and Mr. Sikorn Siwanon as well as Miss. Sineenart Santidherakul and Miss. Fhasai Kuntawong for their help and encouragement.

She was most greatly indebted with all of her heart and soul to her family as well as Mr. Montree Intaramanee for their understanding and support that inspired her to reach her goal. Also, she will keep in mind the love and care received from various other people whom she has not mentioned here.
