ACKNOWLEDGEMENT

I would like to express my sincere gratitude and deepest appreciation to Dr. Prasert Hanmoungjai, my great advisor, for his valuable advice, generous guidance and encouragement throughout development of this thesis. This thesis would not be accomplished without his support, great comment and kindness understanding. Also, I would like to thank Assoc. Prof. Dr. Naiyatat Poosaran for his kindness to give me an opportunity in Master's degree education.

My sincere appreciation are extended to Mr. Pisit Seesuriyachan for his comments on the research, his valuable advice about bacterial strain and support some chemical reagents. I would like to extend the appreciation and gratitude to examining committee members, Dr. Somchai Jomduang and Asst. Prof. Dr. Aphirak Phianmongkol for their guidances and valuable suggestions.

I would like to thank Ms. Sungwaan, Mr. Song-amnart, Mr. Nuttaporn and Ms. Sumakamas for their suggestions about entertaining life and learn in Chiang Mai province. Also, thanks to Fucking Fly Team, Mr. Tewa, Miss Chonticha, Miss Ni-orn, Miss Krongkaew, Miss Chatchaya, Miss Suthida and Miss Ruthairat for their willpower, kindness and support some equipment and facilities

and gave enjoy night to me. Especially, I would like to thank Mr. Pattharapong Methapatr, for his spirit and carefulness.

I would like to thank all lecturers, scientists, friends and students at the Department of Biotechnology, Faculty of Agro-Indutry, Chiang Mai University, for their support, advice, friendship and entertainment.

Finally, I dedicate this thesis to Maungtoom family, Son-In family, my parents, sister, aunts (Ms. Reka Roiwirat and Ms. Thawarat Pootassana) for their love, patience, moral and everything essential for my life and learn.

Kitti Maungtoom
