ACKNOWLEDGEMENTS

Despite all the claims, no work can be done by one person alone. This thesis, too, was prepared with the help of a large number of people. With profound gratitude and sincerity, I wish to acknowledge the following people, without whose help, advice, cooperation, moral support and prayer power work would not have been completed.

First of all, I would like to express my sincere thanks to all who have helped me in any way throughout this thesis. I am especially grateful to my advisor, Assoc.Prof.Dr. Sukon Phanichphant for her kindness, untiring, useful advice, constant guidance and serious supervision, in particular for her encouragement, enthusiasm and constant support throughout the course of my study.

I would like to thank my thesis examination committee members, Assoc.Prof.Dr. Prasak Thavorniyutikarn, Assoc.Prof.Dr. Gobwute Rujijanagul, Assoc.Prof.Dr. Udom Sriyotha, and Dr. Pichai Pirakitikulr. I am very grateful to Assoc.Prof.Dr. Prasak Thavorniyutikarn, Assoc.Prof.Dr. Gobwute Rujijanagul, Assoc.Prof.Dr. Udom Sriyotha, and Dr. Pichai Pirakitikulr for their unfailing encouragement, generous guidance, critical comments, patience and their efforts in keeping my spirits high. Dr. Ponlayuth Sooksamiti at Department of Mineral Resources, The Mineral Resources Region 3, Chiang Mai for his critical thinking, challenge, motivation, continue support and invaluable comments on my study. I am especially grateful to Prof.Dr. Robert B. Heimann at Department of Mineralogy, Freiberg University of Mining and Technology, Freiberg, Germany for his critical thinking, challenge, motivation, continue support and invaluable comments on parts

of my publication papers. I am especially grateful to Prof.Dr. Tawee Tunkasiri for his invaluable assistance and guidance. Special thanks are due to Assist.Prof.Dr. Supon Ananta for his assistance and useful suggestions. Special gratitude must be extended to Prof.Dr. Tawee Tunkasiri and Mr. Suwit Chaisupan at Materials Science Research Laboratory (MSRL) and Dr. Reinhard Kleeberg at Department of Mineralogy, Freiberg University of Mining and Technology, Freiberg, Germany, for XRD facility. I am grateful to Assist.Prof.Dr. Nitat Jira-Arun, Dr. Apinon Nuntiya, Dr. Torranin Chairuang Sri and Mrs. Nongkhran Chaiwong at Department of Industrial Chemistry, Chiang Mai University and Mr. Maeta Chainan from Department of Mineral Resources, The Mineral Resources Region 3, Chiang Mai for particle size analysis. My appreciation is extended to Assoc.Prof.Dr. Pramote Vanittanakom, Mrs. Budsabong Kontalue and Mrs. Natchanart Tichug from Scientific Instrument Center, Faculty of Medicine, Chiang Mai University and Miss Passapan Luangphai and Miss Prakaythip Kot-Asa from Biotechnology Center, Maejo University for SEM facility. I am indebted to Dr. Ulrich Straube from Department of Physics, Martin-Luther-Universitat Halle Wittenberg, Halle, Germany for dielectric measurements.

Of course, the preparation of this thesis would have been impossible without adequate financial support. I would like to acknowledge Teaching Assistance (TA) from Department of Chemistry, Faculty of science, Chiang Mai University, Graduate School, and Department of Chemistry, Faculty of Science, Chiang Mai University for providing me with financial support my graduate study. I am grateful also to the Loan Project Office (LPO), Ministry of University Affairs for sponsoring my short course training on differential scanning calorimeter (DSC) and thermal analysis (TG/DTA) at Institut fur Silikattechnik of the Freiberg University of Mining and Technology,

Freiberg, Germany, and Department of Chemistry, Faculty of Science, Maejo University for supporting my study in Ph.D program at Department of Chemistry, Faculty of Science, Chiang Mai University.

Thanks also go to my colleagues, Dr. Sakdipown Thiansem, Dr. Kedsarin Pimraksa, Dr. Pitak Youmee, Dr. Wongduan Maison, Dr. Suwimon Nualpralasana, Mr. Samart Kongtawelert, Miss Sukanya Kaewsaard, Mr. Worapong Thiamson, Miss La-ongnuan Srisombat, and many others who have given unwavering support, useful comments, criticism and prayer power. Special thank is extended to Frau Ulrike Raulfs who is my teacher and friend.

I am very much indebted to my parents Mr. Narin and Mrs. Sarunya Pookmanee, my sister Mrs. Pathara Korphon, my wife Mrs. Thipsuda Pookmanee and my two daughters Miss Pusida Pookmanee and Miss Purinda Pookmanee, for all they have done to enable me to enthusiasm and make this submission. I am proud of them and grateful to have been born in a happy and loving family.

In closing, it is my fond hope that this thesis will be beneficial for scientists who interested in this field.

There are no words to express my debt, and my heartfelt thanks to all.
