ACKNOWLEDGEMENTS	iii
ABSTRACT (ENGLISH)	iv
ABSTRACT (THAI)	v
TABLE OF CONTENTS	vi
LIST OF TABLES	ix
LIST OF FIGURES	x
ABBREVIATIONS AND SYMBOLS	xii
 CHAPTER 1 – INTRODUCTION	 1
1.1 Introduction	1
1.2 Characteristics of wastewaters from pickling food factory	2
1.3 Salinity	3
1.4 Chloride and its effects	4
1.5 Methods for chloride determination	5
1.5.1 Standard methods	5
1.5.2 The methods employed in this work	7
1.5.2.1 Sequential Injection Analysis (SIA)	7
1.5.2.2 Potentiometric detection	11
1.5.2.3 Argentometric method (Mohr method)	12
1.6 Other supporting parameters	13
1.6.1 pH	13
1.6.2 Dissolved oxygen (DO)	14
1.6.3 Temperature	15
1.6.4 Conductivity	15
1.6.5 Total dissolved solids (TDS)	16
1.7 Design of a monitoring program	16
1.8 Research objectives	18

	Page
CHAPTER 2 - EXPERIMENT	19
2.1 Sampling site description and sample collection	19
2.1.1 Sampling site description	19
2.1.2 Sample collection	22
2.2 Instruments, chemicals and apparatus	23
2.2.1 Instruments	23
2.2.2 Chemicals	24
2.2.3 Apparatus	24
2.3 Preparation of solutions	25
2.3.1 Preparation of reagents for SIA method	25
2.3.2 Preparation of reagents for Argentometric method	26
2.3.3 Preparation of reagents for dissolved oxygen analysis	26
2.4 Determination of chloride by sequential injection potentiometric method	27
2.4.1 Schematic diagram	27
2.4.2 Procedure	27
2.5 Determination of chloride by Argentometric method	28
2.6 Data analysis	28
CHAPTER 3 - RESULTS AND DISCUSSION	30
3.1 Supporting data set	30
3.1.1 Water temperature	33
3.1.2 Conductivity	34
3.1.3 Total dissolved solids	35
3.1.4 pH	36
3.1.5 Dissolved oxygen	37
3.2 Chloride analysis	38
3.2.1 Calibration graph for chloride	38
3.2.2 Chloride results	40

	Page
3.3 Precision study of the SIA method	41
3.4 Accuracy study of the SIA method	43
3.5 General assessment of water quality in terms of salinity	45
3.5.1 The relationship among parameters	45
3.5.2 Chloride variation among sampling times	46
3.5.3 Comparison of control site with other sites	46
3.5.4 General assessment	46
CHAPTER 4 – CONCLUSION	49
REFERENCES	51
APPENDICES	54
APPENDIX 1	55
Pictures of monitoring sites	
APPENDIX 2	60
Procedure of Dissolved Oxygen analysis (Winkler method)	
APPENDIX 3	62
Industrial effluent standards of Thailand (Department of Environmental Quality Promotion – Ministry of Natural Resources and Environment)	
APPENDIX 4	66
Output from data analysis by SPSS program	
CURRICULUM VITAE	70

LIST OF TABLES

Table	Page
1.1 Characteristics of wastewater from pickling manufacture (Linda <i>et al.</i> , 1976)	2
1.2 Brine wastewater in comparison with typical domestic sewage (Brown <i>et al.</i> , 1973)	2
1.3 Salinity classes for irrigation waters (Shaw <i>et al.</i> , 1987)	3
1.4 The relationship of DO, salinity and temperature	14
1.5 Solubility of solutes as a function of temperature	15
2.1 Summary of sites description	20
2.2 Summary of sample collection and using methods	22
3.1 Supporting data - sampling date 7 August, 2003 (Rainy season) – the 1 st time	30
3.2 Supporting data - sampling date 16 September, 2003 (Rainy season) – the 2 nd time	31
3.3 Supporting data - sampling date 2 December, 2003 (Dry season) – the 3 rd time	32
3.4 Supporting data - sampling date 6 January, 2004 (Dry season) – the 4 th time	33
3.5 Voltages of chloride standard solutions	39
3.6 The relative error of the achieved slopes	40
3.7 Chloride concentration (mol/l) of 8 sampling sites during 4 sampling times by SIA method	40
3.8 Precision study of chloride standard solutions	42
3.9 Chloride concentration (mol/l) of 8 sampling sites during 4 sampling times by Mohr method (cf. Table 3.7)	43
3.10 Average chloride of each site by two methods	44

LIST OF FIGURES

Figure	Page
1.1 Typical sequential injection system utilizing programmed forward, reversed and stopped flow. HC, Holding coil; AW, auxiliary waste; and W, waste (Ivaska <i>et al.</i> , 1993)	8
1.2 Sequenced zones of reagent (R) and sample (S) intersperse during flow reversal while the detectable product (P) is formed. On arrival at the detector a suitable section of the product zone is captured within the observation field of the detector by selecting a stop delay time t_d for reaction-rate measurement (Ivaska <i>et al.</i> , 1993)	9
1.3 Principle of sequential injection technique showing manifold (top) and readout (below). The plunger of the piston pump moves in discrete steps to aspirate wash solution (W), sample solution (S) and reagent solution (R) into a channel which consists of reaction (R), detection (D) and hold-up (H) sections. The selector valve provides sequential injection of the solutions into the channel through preprogrammed steps synchronized with piston movement. The record (below) shows a typical double peak, the trough of which is located at the time when the flow has been reversed (Ruzicka <i>et al.</i> , 1990)	10
1.4 Steps in the design of a monitoring program	17
2.1 The study site	20
2.2 Diagram of sampling sites	21
2.3 The SIA system for chloride determination	25
2.4 A schematic diagram of the SIA system for chloride determination	27
3.1 Water temperature variation among sampling times and sites (see Tables 3.1 – 3.4)	34
3.2 Conductivity variation among sampling times and sites (see Tables 3.1 – 3.4)	35

Figure	Page
3.3 TDS variation among sampling times and sites (see Tables 3.1 – 3.4)	36
3.4 pH variation among sampling times and sites (see Tables 3.1 – 3.4)	37
3.5 DO variation among sampling times and sites (see Tables 3.1 – 3.4)	38
3.6 Calibration graphs for chloride	39
(A) Concentration in range of 30 – 300 ppm	
(B) Concentration in range of 0.01 – 0.12 M	
3.7 Chloride variation among sampling times and sites	41
3.8 Precision study of SIA method	42
3.9 Comparison chloride results of two methods	44
3.10 Linear correlation between the two methods	45
3.11 Wastewater from factory discharges to around channel	48

LIST OF ABBREVIATIONS AND SYMBOLS

DO	Dissolved Oxygen
BOD	Biochemical Oxygen Demand
TDS	Total Dissolved Solids
SIA	Sequential Injection Analysis
FIA	Flow Injection Analysis
Temp.	Temperature
I.D.	Internal diameter
TP	Total phosphorus
SS	Suspended solids
Kjeld-N	Total Kjeldahl nitrogen
Cond.	Conductivity
TOC	Total organic carbon
APHA	American Public Health Association
LSD	Least significant difference
SD	Standard deviation
%RSD	Relative standard deviation
