## ACKNOWLEDGEMENT

I am greatly pleased to extend my sincere gratitude to all those who offered me help and support during my graduate study.

Firstly, I wish to express my appreciation and respect to Asst. Prof. Dr. Noppamas Rojanasthien, my advisor as well as the chairperson of this thesis examination committee, for her immeasurable guidance, encouragement, and support throughout my thesis work.

My respect and gratefulness are also to Prof. Dr. Dusit Lumlertkul, including his excellent health care team and staff in Division of Nephrology, Department of Medicine, Faculty of Medicine, for their valuable help and guidance of this thesis.

My sincere appreciation goes to Assoc. Prof. Dr. Prachya Kongtawelert and his kind staff in Department of Biochemistry, Faculty of Medicine, for their excellent instruction and training. Their teaching and suggestions were very helpful for understanding of this thesis.

I am very thankful to all staff and graduate students of Department of Pharmacology for their instruction and support.

I also would like to thank Graduate School, Chiang Mai University, for the scholarship to study. Faculty of Medicine Endowment Fund for Medical Research, Thailand, supported to work on this thesis.

Finally, my special gratefulness is to my family, for their love, support, understanding and encouragement throughout my life.
