## ACKNOWLEDGEMENT

I would like to express my deep appreciation and gratitude to all those who gave me the possibility to complete this thesis. A sincere appreciation is also extending to all staff of the Department of Pharmacology for their instructions and their support throughout my graduate study.

I am deeply indebted to Asst.Prof.Dr.Noppamas Rojanasthien, the chairman of a supervisory committee for her excellent guidance, encouragement, kind support, commitment and her help on the writing of this thesis which has enabled me to carry on my graduate work successfully.

A sincere gratefulness to Asst.Prof.Dr.Sornporn Chotinaruemol, Asst.Prof.Dr.Watcharee Tantiprabha and Asst.Prof.Dr.Sukit Roongapinun, the member of a supervisory committee for their encouragement, kind support and commitment.

A special gratefulness to Assoc.Prof.Dr.Chaichan Sangdee for a valuable help on the writing of this thesis.

I also would like to thank all nurse staff in newborn3, 4, NICU wards for their participation in the research work, and special thank to the Faculty of Medicine Endowment fund for Medical Research, Chiang Mai University, Thailand for their financial support of this project.

Finally, a sincere thank to my family for their support and encouragement during my education.
