ACKNOWLEDGEMENT

No work can be done by one person alone. This thesis was prepared with the help of many people. With profound gratitude and sincerity, I wish to acknowledge the following persons, without whose help, advice, cooperation, moral support and prayer, power work would not have been completed.

First of all, I would like to express my sincere gratitude and deep appreciation to all staffs of the Department of Pharmacology for their instructions, supports and allowed me to enter this program and made my dream came true.

I also wish to express my deepest appreciation and gratitude to Asst. Prof. Dr. Supanimit Teekachunhatean, the chairperson of the supervisory committee for my thesis work, for his kindness, untiring, useful advice, invaluable guidance on the research plan, data analysis and the writing of this thesis and serious supervision, in particular for his encouragement, enthusiasm and constant support throughout this work.

I would like to thank my thesis committee members, Assoc. Prof. Dr. Chaichan Sangdee, Assoc. Prof. Dr. Ampai Panthong, Asst. Prof. Dr. Noppamas Rojanasthien, and Assoc. Prof. Sorasak Lhieochaiphant. I am very grateful to Assoc. Prof. Dr. Chaichan Sangdee and Assoc. Prof. Dr. Ampai Panthong for their kind assistance, valuable information and suggestions, helpful advice and generous guidance on the writing of this thesis. I appreciate the efforts of Asst. Prof. Dr. Noppamas Rojanasthien for her assistance and useful suggestions. Special thanks are due to Assoc. Prof. Sorasak Lhieochaiphant, who kindly helped me in preparing, conducting the quality control and standardization of the Chinese herbal recipe used in this study.

A special gratefulness is also extended to Asst. Prof. Dr. Suwalee Pojchamarnwiputh for reports on radiographic findings of knees; Asst. Prof. Dr. Sumalee Pruksakorn for screening for microorganism contamination, and Assoc. Prof. Dr. Pornngarm Limtrakul for providing the methods and equipment used in screening for aflatoxin contamination.

Special gratitude must be extended to Dr. Maythawee Numprasurt for her kindness and enthusiasm in assessing the clinical outcome and adverse events. Of course, the preparation of

this thesis would have been impossible without the kindly and well cooperation of all patients and the assistance and cooperation of Mr. Boonyium Kumsorn, Mr. Kongkaew Pichakan, Mrs. Wilai Duangtaworn and Miss Rapheephorn Khatsri in interviewing, collecting blood sample and so on.

I also wish to express my thanks to all my beloved friends for their special support, encouragement and unforgettable friendship.

In closing, my love and deepest appreciation must be given to my dearest husband for his kindness, understanding, encouragement, support and patience and for giving me the excellent opportunity to pursue my doctoral degree study and for his willingness to sacrifice and endure without any complaint. Many thanks to my lovely daughter and son for their love, support, care, and for being good which has helped to make this study a reality.

It is my fond hope that this research will be beneficial for some people who are interested in the research in this field.

Thank you all

Puongtip Kunanusorn
