## ACKNOWLEDGEMENTS

I would like to express my gratitude with the highly indebtedness to my advisor, Assoc.Prof.Dr. Yanee Pongpaibul for her continuous supports in reading, giving valuable advice and suggestions for the completion of this thesis. And I also would like to express my indefinitely gratefulness for her patience and kindness.

Considerably thanks go to Dr. Chadarat Duangrat who has been my co-advisor for her helpful assistance and effort in the thesis fulfillment, and Assoc.Prof.Dr. Puckprink Sangdee for serving on the examining committee.

Grateful appreciation is also due to Assoc.Prof. Ladda Wongpayapkul who contributed the advice and valuable comments throughout the process of my experiment.

I would like to thank a number of people for their favour throughout my study; Mrs. Wanna Kabsri, Miss Naruechol Wongchan, and Mr. Prapas Puwiang, the laboratory officers.

Special thanks go to Graduate school, Chiang Mai University for the research fund, Oui Heng Co., Ltd. for contribution the raw material of tranexamic acid imported from Daiichi Pharmaceutical Co., Ltd, and Neoplast Co., Ltd. for giving the backing material of a patch as charity.

An appreciation for helpful to my brother, a lecturer of English major, faculty of humanity, Chiang Mai university, who is more skillful in english literature than I. Finally, this successful of my life would never have been existed without the never-ending love and encouragement of my parent who are my all. I would like to dedicate it to their wish.
