ACKNOWLEDGEMENTS

This thesis is substantially based on my fieldwork in Stung Treng province of Cambodia from October 2002 to early April 2003 and my coursework studies with the Regional Center for Social Science and Sustainable Development (RCSD) from 2001 to 2002. However, I would never have been able to undertake or complete this project if there was not support from the following extraordinary people and institutions:

First of all, I would like to thank my thesis advisory committee. I would like to express my deepest gratitude to Dr. Chusak Wittayapak, my thesis adviser who has kindly devoted his time guiding and preventing me from getting off track. He has constantly challenged me to think deeply and independently, and has given me the gift of his admirably unfailing attending to detail. I would like to thank Dr. Chayan Vaddhanaphuti, the member of my thesis committee whose theoretical insight and unfailing support have enabled me to keep going until now. His attitude to me deserves my deepest appreciation for his dedicated and gentle guidance in terms of academic contribution and personal encouragement. The other advisory committees: Dr. Pinkaew Laungaramsri receives my great thanks for pushing me to be more independent and her final comments on the thesis title and methodologies. And my external advisor, Dr. Louis Lebel (who is currently director of Unit for Social and Environmental Research at Faculty of Social Sciences, Chiang Mai University) for his challenges and strong comments on my conceptual framework, thesis title and the suggested reading materials. However, all of their constructive instructions made a great contribution to the completion of this research project.

At RCSD, I would like to thank committee members who come from different programs of Chiang Mai University. These lecturers and professors are: Dr. Santita Ganjanapan, Dr. Jamaree ChiengThong, Dr. Yos Santasombat, Ajarn Ekkamol, Associate Prof. Seksin, Ajarn Preuk and others. However, this thesis would not be possible without funding support from the Ford Foundation through the Regional Center for Social Science and Sustainable Development (RCSD) under the directorship of Dr. Pong-In Rakariyatham and also as the Dean of the Faculty of Social Sciences and Dr. Anan Ganjanapan who acts as the chair of the Academic program. I have had the privilege of doing my graduate study with RCSD program of

Chiang Mai University that has also been one of the most wonderful places for me to grow intellectually. Therefore, my special thanks will also go to its staff members who have been superb in terms of their warm personal friendships and kind academic assistance to me.

In Cambodia, I would like to express my unforgettable brotherhood and sisterhood in Phnom Penh. These people are: Ms. Huong Nita, Mao Sotheary, Him Sokleang, and Mr. Eam Dyna, Ngon Marady, Keat Pheng, and Vannara Tek. These people were really helpful to me while I was in need of help in terms of financial crisis and documentations needed for my research.

At Stung Treng province where I conducted my fieldwork, I would like to thank my NGO colleagues in CEPA for their support and facilitation. I also would like to thank Mr. Chea Kim Sean, Director of Provincial Department of Environment and all his staff for their documents and the willingness to support my fieldwork, Mr. Mao Chan Samorn, the acting Director of Provincial Fishery Office and his staff for their times and documents to share with me.

However, I would never forget my respectful and gratefulness friends: Dave Hubbell from TERRA for his strong recommendations and enthusiasm to me to study here, Mr. John Dore, a doctoral candidate from National University of Australia, who is currently a visiting scholar with the Social Research Institute of Chiang Mai University. I would like to thank him for his suggesting to me for the related documents. Mr. Mak Sithirith, my colleague from Cambodia who is now undertaking his research fellowship with RCSD, I would like to thank him for his comments on my research methods. The other friend is Mr. Chainarong Sretthachau and his colleagues working with SEARIN based in Chiang Mai where we have shared ideas regarding social development and established further connection for the regional level. I also would like to thank all my classmates who come from different countries to study and to share our experiences with Chiang Mai University, in particular RCSD program.

Finally, I would like to thank my parents, my sisters and my brothers for their care and encouragement while I am away on study here.

Try Thuon
