ACKNOWLEDGEMENTS

I am extremely grateful to Assoc. Prof. Dr. Saisamorn Lumyong for her excellent supervision, invaluable discussion and concern. I would like to thank the following for their help in making this work possible: Prof. Dr. Kevin D. Hyde and Dr. Eric H.C. McKenzie for their encouragement, invaluable help, suggestions on this study, their expertise to provide taxonomic guidance and untiring co-supervision; Lecturer Pipob Lumyong for encouragement and his valuable comments. I also thank Dr. Tosak Seelanan and Dr. Uraporn Sardud for advice in some data analysis and critical comments.

I wish to acknowledge the financial support from The Thailand Research Fund (The Royal Golden Jubilee Ph.D. Program 4BCM43D1 and BGJ4680011) for the award of Postgraduate Scholarship and Biodiversity Program of Chiang Mai University for partial financial support.

Laboratory of Plant Pathology, Faculty of Agriculture, Chiang Mai University, Centre for Research in Fungal Diversity, Department of Ecology & Biodiversity, the University of Hong Kong, Hong Kong SAR, China, Landcare Research, Auckland, New Zealand and Laboratory of Applied Microbiology, Graduate School of Agriculture, Hokkaido University, Sapporo, Japan, are thanked for laboratory facilities. All colleagues in each laboratory are also thanked for their friendships, and making me have nice experiences.

My special thanks to the following people: Insom Thongkantha and Fongnuan Thongkantha for help with collecting samples; Dr. Welcome Ho for his kindness on

training of correspondence analysis using the JMP statistics and graphics program; Duchel Park for his advice on molecular work at Landcare Research; Prof. Dr. Kozo Asano, Dr. Teruo Sone and Tatsuya Miyazawa for kind advice on isolation and purification of bioactive compounds at Hokkaido University; Prof. Dr. Pranom Chantaranothai who provided some zingiberaceous literature; J.F. Maxwell who kindly gave advice on zingiberaceous identification and provided some zingiberaceous literature; Dr. Amy Y. Rossman and Prof. Dr. Fusao Tomita for their help and kindness.

Sutheera Thongkantha, Phanit Mitr-Ngarmmuang, Theerarat Chareondee, Chalermkhun Kedmanee, Surattiwadee Paak-Uthai, Watee Kongbuntad, Intira Thampayak, Rarunee Sanmee, Rampai Kodsueb, Weraphol Bhilabutra, Itthayakorn Promputtha, Pairote Wongputtisin, Sutthinan Khamna, Juangjun Jumpathong, Sirirat Jailae, Chatchai Kosawang, Sumalee Mensin and other friends in Agriculture and Biology laboratories, Chiang Mai University, are thanked for encouragement and for all their help. Nitaya Boontim, Warin Techa, Wipornpan Photita and Sulichet Thongklam also thanked for their good advice.

My warm thanks go to my best friends, Pranom Unchoorit and friends in high school days, Sukanya Saengthong, Chanintorn Duangsa-ard, Nareerat Roddorn, Jeeranan Chaiwarit, Chanchira Boonpeng, Nattawadee Wangsin and Thanadech Mahuemaung, for their kindness mind, special friendship, help and encouragement.

Finally, much appreciation is specially expressed to my family who provided their love, endless patience and encouragement throughout my study. This thesis I am dedicating to my family whom I love most.

Boonsom Bussaban
