## ACKNOWLEDGEMENTS

I would like to extend my deep appreciation to Dr. Porntip Chantaramongkol, my major supervisor, who gave essential assistance and advice at every phase of this study from field collections to editing of the manuscript. It is a pleasure to acknowledge her unwavering patience and enthusiasm.

I am grateful to Prof. Dr. Hans Malicky for their enthusiasm and assistance on insect identification training and specimen verification.

The members of my thesis examination committee: Assoc. Prof. Dr. Narit Sitasuwan and Dr. Prachaub Chaibu are to be thanked for their criticism and advice.

Many individuals were helpful in fieldwork, laboratory processes and their suggestions to this study. In this regard I thank: Dr. Siraborn Cheunbarn, Assist. Prof. Dr. Pongsak Laudee, Dr. Decha Thapunya, Ms. Teang-on Prommi, Ms. Penkhae Thamsenanupap, Ms. Jirayu Nawvong, Ms. Pensri Bunlue, Mr. Somyot Silalom, Mr. Arthit Nuntakwang and many friends whose names do not appear in this acknowledgement.

Additional thanks are extended to Mr. Russell Kirk Hollis for his proof-reading assistance on this research paper.

Special thanks are extended to my family for their love and supports

I would also like to thank the National Research Council of Thailand (NRCT) and Department of National Park, Wildlife and Plant Conservation for use of their field trip facilities and permission to collect in national parks of Thailand.

Financial supports for this study was given through a grant of the National Science Foundation (Grant DEB-0103144).

Nattaphorn Changthong
