ACKNOWLEDGEMENTS

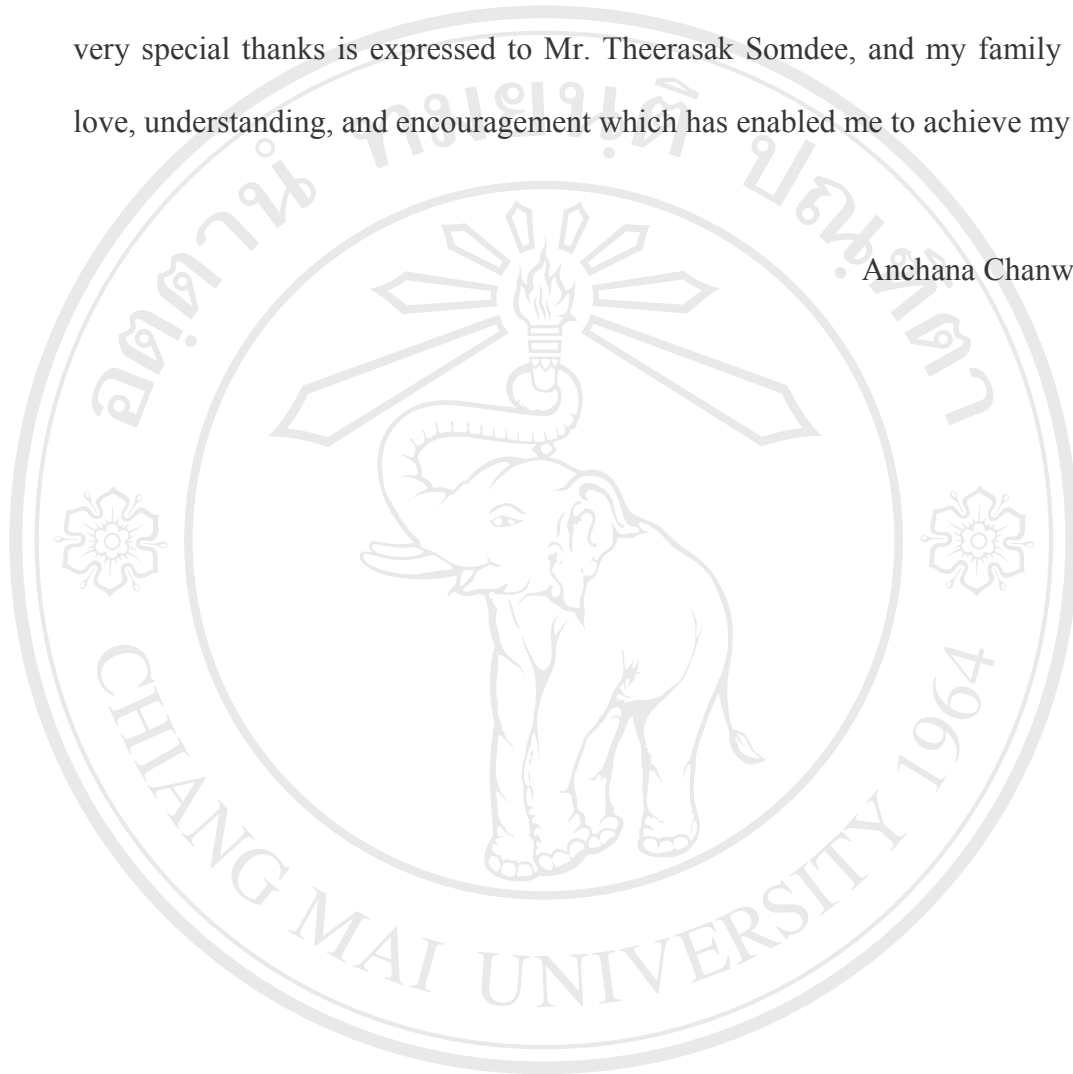

I would like to express my deep appreciation and sincere gratitude to my supervisor, Assoc. Prof. Dr. Nuansri Rakariyatham for her supervision, thoughtful guidance, encouragement and constant inspiration throughout the course of this research. I am also deeply grateful to Dr. Aphiwat Teerawutgulrag for his kind and extremely helpful advice, especially on the structure elucidation. I also would like to express my sincere thanks to Dr. Teerapol Wongchanapiboon for his suggestion and proof reading. My profound thanks convey to Asst. Prof. Dr. Yuthsak Vaneesorn and Assoc. Prof. Dr. Duang Buddhasukh, examining committee for their valuable comment and suggestion.

I am grateful to the Royal Golden Jubilee scholarship of the Thailand Research Fund for financial supports of my research work. My sincere thank is extended to Prof. Dr. Jeremy D. Kilburn, School of Chemistry, University of Southampton, for his advise and encouragement during my research time in Southampton.

I also wish to thank the staffs of the Department of Chemistry, Faculty of Science, Chiang Mai University for their technical helps particularly Mr. Pisan Kitsawatpiboon for GC-MS instrument and Mr. Naroungchai Tongpitak for FT-IR operating. Moreover, my appreciation is also extended to PERCH Mass Spectrometry Research Laboratory, Department of Chemistry, Faculty of Science, Chiang Mai University, for MS analysis.

Last, I would like to express my appreciation to all of my friends and colleagues for their help, and encouragement during the course of my research. A very special thanks is expressed to Mr. Theerasak Somdee, and my family for their love, understanding, and encouragement which has enabled me to achieve my Ph. D.
