ACKNOWLEDGEMENT

The author wishes to express her sincere appreciation to her supervisor, Dr. Sunanta Wangkarn, for her kind advice, interest, and continual encouragement throughout this research work. These will be forever remembered with great appreciation.

The author gratefully acknowledges Asst. Prof. Dr. Churairat Doungduen, Chemical Research Institute, Rajamagala Institute of Technology, for the provision of excellent laboratory facilities and instrument for analyze. She is also extremely grateful to Assoc. Prof. Dr. Saisunee Liawruangrath for her kind assistance, useful discussion and provision of the additional facilities that are necessary for this work. For the seaweed samples, author would like to acknowledge Archarn Sirirat Chanvaivit (University of Burapa) for her kind donation. The author also thanks for the staff of the Chemical Research Institute for the admirable technical service.

Thanks are also due to all of the author's friends in the Department of Chemistry, Faculty of Science, Chiang Mai University.

The author thanks the Postgraduate Education and Research in Chemistry Program (PERCH) and The Graduate School of Chiang Mai University for the supplying a graduate scholarship grant which enabled this work to be carried out.

The author would like to thank peoples those names are not listed here, and those who have one way or another contributed to the success of this work. Last and most of all, the author would like to express his deepest gratitude to my parents for their tender loves, care and endless encouragement that enabled her to carry out this research work successfully.
