ACKNOWLEDGEMENT

The complete of this project and my thesis work will not success if without helping from many people, whom I would like to appreciate;

Gratefully thanks are giving to my advisor Dr. Somporn Chantara, and my co-advisor Dr. Urai Tengjaroenkul, whose gave an opportunity for me to work in Acid Deposition Monitoring project, and spent her precious time to advice, suggest, knowledge and correction of problem throughout this course. I also deeply thanks to member of an examination board, Dr. Sarawut Thepanondh, Air Quality and Noise Management Bureau from Pollution control Department (PCD).

Ms. Thanaporn Na-Chiang Mai, scientist of Chemistry Department, for her support and useful suggestion for my analysis work on Ion Chromatography, Mrs. Ing-on Chaisri, for her helping to collect sample from sampling site in long sampling period and the primary data of all samples.

I would like to thank you all people from Northern Meteorological Centre of Chiang Mai and Mae Hia Research Centre, Chiang Mai University Campus for information and meteorological data in Chiang Mai province and sampling site in my study year.

I would also like to thank the Pollution Control Department, Thailand (PCD) for their financial support during running this thesis.

Finally, I have to give a big thanks to my parents who are gives strong support and always love me, all friends form Chemistry Department and Environmental

Science program whom gave many help, suggestion to me. However, even if I can't say all of their name here but I will always appreciate all of their kindly help.
