Chapter 1: Introduction	1
Chapter 2: Literature Review	3
Chapter 3: Materials and Methods	13
Chapter 4: Results and Discussion	26
Chapter 5: Conclusion	62
References	64
Appendices	69
Appendix A: BMWP score values table	70
Appendix B: HBI tolerance value tables	73
Appendix C: Chemical Analysis	81
I. Total Coliform Bacteria Analysis: Multiple-tube Fermentation	81
II. Alkalinity: Titration Method	83
III. Dissolved Oxygen (DO): Azide Modification Method	84
IV. Biochemical Oxygen Demand (BOD): Direct Method	86
Appendix D: Surface Water Quality Standards of Thailand	87
Appendix E: Results of physical and chemical properties	90
Appendix F: Aquatic Insects pictures	94
Curriculum Vitae	110

LIST OF TABLES

Table	Page
4-1 Aquatic insect samples from Mae Kham Watershed from October 2003 to August 2004	29
4-2 Comparison of biological indices in each sampling time of the Mae Kham Watershed from October 2003 to August 2004	41
6-1 BMWP score values table	70
6-2 Interpretation of ASPT	72
6-3 HBI Tolerance Value Tables	73
6-4 Interpretation of HBI Scores	80
6-5 MPN Determination from multiple tube test	82
6-6 Surface Water Quality Standards of Thailand	87
6-7 Classification and Objectives	89
6-8 Results of physical and chemical properties of the Mae Kham Watershed from October to December 2003 (cool dry season)	91
6-9 Results of physical and chemical properties of the Mae Kham Watershed from March to May 2004 (hot dry season)	92
6-10 Results of physical and chemical properties of the Mae Kham Watershed from July to August 2004 (rainy season)	93

LIST OF FIGURES

Figure	Page
3-1 Map of the Mae Kham Watershed (showing 8 sampling sites), Mae Chan and Mae Fah Laung District, Chiang Rai Province	17
3-2 Study sites 1 to study site 4	18
3-3 Study sites 5 to study site 8	19
3-4 Sampling methods	21
4-1 Percentage of individuals in each insect order of the Mae Kham Watershed from October 2003 to August 2004	27
4-2 Number of insects in each season separated by site of the Mae Kham Watershed from October 2003 to August 2004	27
4-3 Total number of taxa in each insect order of the Mae Kham Watershed from October 2003 to August 2004	28
4-4 Total number of all insect taxa in each site of the Mae Kham Watershed from October 2003 to August 2004	28
4-5 Total Coliform bacteria for each sampling time of the Mae Kham Watershed from October 2003 to August 2004	43
4-6 Altitude in each sampling site of the Mae Kham Watershed	44
4-7 Air temperature in each sampling period of the Mae Kham Watershed from October 2003 to August 2004	46
4-8 Water temperature in each sampling period of the Mae Kham Watershed from October 2003 to August 2004	47
4-9 The turbidity in each sampling period of the Mae Kham Watershed from October 2003 to August 2004	47
4-10 The velocity in each sampling period of the Mae Kham Watershed from October 2003 to August 2004	49
4-11 The pH in each sampling period of the Mae Kham watershed from October 2003 to August 2004	49

LIST OF FIGURES (CONTINUED)

Figure	Page
4-12 The conductivity in each sampling period of the Mae Kham Watershed from October 2003 to August 2004	51
4-13 The alkalinity in each sampling period of the Mae Kham Watershed from October 2003 to August 2004	51
4-14 The DO values in each sampling period of the Mae Kham Watershed from October 2003 to August 2004	53
4-15 The BOD values in each sampling period of the Mae Kham Watershed from October 2003 to August 2004	53
4-16 Nitrate nitrogen concentrations in each sampling period of the Mae Kham Watershed from October 2003 to August 2004	56
4-17 Ammonia nitrogen concentrations in each sampling period of the Mae Kham Watershed from October 2003 to August 2004	56
4-18 Orthophosphate concentrations in each sampling period of the Mae Kham watershed from October 2003 to August 2004	57
4-19 The cluster analysis of sampling periods by using physico-chemical properties of the Mae Kham Watershed from October 2003 to August 2004	58
4-20 The cluster analysis of sampling periods by using aquatic insects diversity of the Mae Kham Watershed from October 2003 to August 2004	59
4-21 The correlation of sampling periods by using aquatic insects diversity of the Mae Kham Watershed from October 2003 to August 2004	59
4-22 The correlation between aquatic insect orders and water quality of the Mae Kham Watershed from October 2003 to August 2004	60
4-23 The correlation between biotic indices and water quality in some physico-chemical properties of the Mae Kham Watershed from October 2003 to August 2004	61

ABBREVIATIONS

Abbreviation	Meaning
O.	Order
Cl.	Class
F.	Family
Fam.	Family
Ephe	Order Ephemeroptera
Odon	Order Odonata
Hemi	Order Hemiptera
Cole	Order Coleoptera
Tric	Order Trichoptera
Dipt	Order Diptera
Plec	Order Plecoptera
Lepi	Order Lepidoptera
Coll	Order Collembora
Mega	Order Megaloptera
A	Adult
L	Larvae
P	Pupa
Oct	October
Dec	December
Mar	March
Jul	July
Aug	August
gr	group
Velo	Velocity
Cond	Conductivity
Alk	Alkalinity
