| 3.4 Sample preparation                                   | 24 |
| 3.5 Adjustment of soil nutrients                         | 25 |
| 3.6 Aeration flow rate                                   | 26 |
| 3.7 Physical and Chemical Analyses                       | 28 |
| 3.7.1 Measurement of soil temperature                    | 29 |
| 3.7.2 Measurement of soil pH                             | 29 |
| 3.7.3 Determination of soil texture                      | 29 |
| 3.7.4 Determination of soil moisture content             | 30 |
| 3.7.5 Determination of organic carbon                    | 30 |
| 3.7.6 Determination of total nitrogen                    | 31 |
| 3.7.7 Determination of phosphorous                       | 32 |
| 3.7.8 Determination of total petroleum hydrocarbon (TPH) | 33 |
| 3.8 Enumeration of heterotrophic bacterial               | 33 |
| 3.9 Statistical analyses                                 | 34 |
| 3.10 The flowchart of experiment                         | 34 |

## **CHAPTER 4 RESULTS AND DISSCUSION** 36

|                                                  |    |
|--------------------------------------------------|----|
| 4.1 Characteristic of contaminated soil          | 36 |
| 4.2 Soil pH and density                          | 37 |
| 4.3 Adjustment of soil porosity                  | 40 |
| 4.4 Soil temperature                             | 40 |
| 4.5 Soil nutrients                               | 42 |
| 4.6 Soil moisture content                        | 49 |
| 4.7 Enumeration of total heterotrophic bacterial | 53 |

|                                       |    |
|---------------------------------------|----|
| 4.8 Total petroleum hydrocarbon (TPH) | 59 |
|---------------------------------------|----|

## **CHAPTER 5 CONCLUSIONS AND RECOMMENDATIONS** **69**

|                 |    |
|-----------------|----|
| 5.1 Conclusions | 69 |
|-----------------|----|

|                     |    |
|---------------------|----|
| 5.2 Recommendations | 72 |
|---------------------|----|

## LIST OF TABLES

| Table                                                                              | Page |
|------------------------------------------------------------------------------------|------|
| 2.1. Factors for energy distribution for biomass synthesis in redox reaction       | 15   |
| 3.1. The amount of forced air to the tank experiment                               | 28   |
| 4.1 Physical and chemical properties of the soil of the bioremediation experiment  | 36   |
| 4.2 Soil pH and bulk density of the sampling sites                                 | 37   |
| 4.3 Variation of soil pH during biopile experiment                                 | 37   |
| 4.4 The soil pH after biopile experiment                                           | 39   |
| 4.5 Mixing composition between soil site 3 and soil site 7                         | 40   |
| 4.6 Soil temperature at all tanks after biopile experiment                         | 42   |
| 4.7 Temporal variation of nitrogen during biopile experiment                       | 43   |
| 4.8 Concentration of phosphorous during biopile experiment                         | 44   |
| 4.9 Concentration of nitrogen and phosphorous after biopile experiment             | 47   |
| 4.10 The percentage removal of organic carbon during biopile experiment            | 48   |
| 4.11 The final moisture content of all tanks                                       | 51   |
| 4.12 Percentage of moisture content lost during biopile experiment                 | 52   |
| 4.13 The heterotrophic microbial number after biopile experiment                   | 58   |
| 4.14 Temporal variations of the TPH content in all tanks during biopile experiment | 60   |

|                                                                                                          |    |
|----------------------------------------------------------------------------------------------------------|----|
| 4.15 The concentration of hydrocarbon after biopile experiment                                           | 61 |
| 4.16 The slope and goodness of fit of the linear line regression for all tanks during biopile experiment | 65 |
| 4.17 The comparison of degradation rate between the present experiment and some previous studies         | 67 |
