ABSTRACT	xii
LIST OF TABLES	xxiv
LIST OF ILLUSTRATIONS	xxvii
CHAPTER 1 INTRODUCTION	1
1.1 General introduction	1
1.2 Objective	6
1.3 Scope, planning, and methodology	7
1.4 Education advantages	8
1.5 Previous works	8
1.5.1 Structural geology and tectonic setting	8
1.5.2 Sedimentology	13
1.5.3 Stratigraphy	16
1.5.4 Paleontology and palynology	19
CHAPTER 2 GEOLOGY	24
2.1 Physiographic features	24
2.2 General geology	25
2.3 Study areas	27

2.3.1 Mae Moh coal field	26
2.3.1.1 Geologic setting of the Mae Moh basin	28
2.3.1.2 Mae Moh stratigraphic succession	32
2.3.2 Chiang Muan coal field	50
2.3.2.1 Geologic setting of the Chiang Muan basin	50
2.3.2.2 Chiang Muan stratigraphic succession	53
2.3.3 Mae Teep coal field	58
2.3.3.1 Geologic setting of the Mae Teep basin	61
2.3.3.2 Mae Teep stratigraphic succession	64
2.3.4. Ngao coal field	66
2.3.4.1 Geologic setting of the Ngao basin	67
2.3.4.2 Ngao stratigraphic succession	67
2.3.5. Wang Nua coal field	71
2.3.5.1 Geologic setting of the Wang Nua basin	71
2.3.5.2 Wang Nua stratigraphic succession	74
CHAPTER 3 SAMPLE COLLECTION AND ANALYTICAL	76
METHODS	
3.1 Sample collection	76
3.1.1 Mae Moh basin	77
3.1.2 Chiang Muan basin	82
3.1.3 Mae Teep basin	84
3.1.4 Wang Nua basin	84
3.1.5 Ngao basin	84

3.2 Analytical conditions	90
3.2.1 Sample preparation	90
3.2.2 Proximate and ultimate analyses	90
3.2.2.1 Proximate analysis	90
3.2.2.2 Ultimate analysis	91
3.2.3 X-ray diffraction	92
3.2.4 X-ray fluorescence spectrometry analyses	94
3.2.5 Induced couple plasma optical emission spectrometry analyses	96
3.2.6 Coal petrography	96
3.2.7 Sulfur isotope	98
3.2.8 Carbon and oxygen isotopes	102
CHAPTER 4 RESULTS AND INTERPRETATION	103
4.1 Proximate and ultimate analyses	103
4.1.1 Proximate analysis	103
4.1.2 Ultimate analysis	107
4.1.3 Result of proximate and ultimate analyses	116
4.2 X-ray diffraction	121
4.2.1 XRD analysis result	121
4.2.1.1 Mae Moh coal field:	121
4.2.1.2 Chiang Muan coal field.	123
4.2.1.3 Mae Teep coal field.	123
4.2.1.4 Wang Nua coal field.	125

4.2.1.5 XRD analysis in selected coal	126
4.2.2 Mineralogy	128
4.2.2.1 Quartz	128
4.2.2.2 Carbonates	130
4.2.2.3 Clay minerals	133
4.2.2.4 Sulfide minerals	135
4.2.2.5 Sulfates minerals	139
4.2.2.6 Phosphates	139
4.3 Geochemistry	141
4.3.1 Mae Moh coal field	141
4.3.1.1 Major oxide	141
4.3.1.2 Trace elements	145
4.3.2 Chiang Muan coal field	150
4.3.2.1 Major oxide	150
4.3.2.2 Trace elements	155
4.3.3 Mae Teep coal field	159
4.3.3.1 Major oxide	159
4.3.3.2 Trace elements	159
4.3.4 Wang Nua coal field	165
4.3.4.1 Major oxide	165
4.3.4.2 Trace elements	165
4.3.5 Ngao coal field	169
4.3.5.1 Major oxide	169
4.3.5.2 Trace elements	169

4.4 Coal petrography	182
4.4.1 Mae Moh coal field.	182
4.4.2 Chiang Muan coal field.	188
4.4.3 Mae Teep coal field.	191
4.4.4 Wang Nua coal field	191
4.4.5 Ngao coal field.	193
4.5 Sulfur isotope	195
4.5.1 Mae Moh coal field	195
4.5.2 Chiang Muan coal field	195
4.6 Carbon and oxygen isotope	206
4.6.1 Mae Moh coal field	206
4.6.2 Chiang Muan coal field	206
4.6.3 Wang Nua coal field	206
4.7 Carbon, hydrogen, nitrogen and sulfur in coal and sediment	219
4.7.1 Mae Moh coal field	219
4.7.2 Chiang Muan coal field	219
4.7.3 Mae Teep coal field	219
4.7.4 Wang Nua coal field	219
4.7.5 Ngao coal field	219
CHAPTER 5 CONCLUSIONS AND RECOMMENDATIONS	227
5.1 Mae Moh coal field	227
5.2 Chiang Muan coal field	235

5.3 Mae Teep coal field	238
5.4 Wang Nua coal field	239
5.5 Ngao coal field	241
5.6 Recommendations	244
REFERENCES	245
APPENDIX A Sample description and collected location	273
APPENDIX B The proximate and ultimate analyses data	286
APPENDIX C Semi-quantitative XRD data and XRD diffractogram	290
APPENDIX D Geochemical analysis of major oxide and trace elements data	301
APPENDIX E Carbon, hydrogen, nitrogen, and sulfur analyses data of sediments and coals	313
APPENDIX F Gastropods and Bivalves description	320
CURRICULUM VITAE	338

LIST OF TABLES

Table	
1.1	History of stratigraphic nomenclature applied to the Cenozoic of the Mae Moh basin 17
3.1	The number of samples for geochemical analysis 77
4.1	The proximate and ultimate analyses of Mae Moh coals 104
4.2	The proximate and ultimate analyses of Chiang Muan coals 104
4.3	The proximate and ultimate analyses of Mae Teep, Wang Nua, and Ngao coals 105
4.4	C/N and C/S ratios of coal samples from Mae Moh coal field 111
4.5	C/N and C/S ratios of coal samples from Chiang Muan coal field 112
4.6	C/N and C/S ratios of coal samples from Mae Teep coal field 112
4.7	C/N and C/S ratios of coal samples from Wang Nua coal field and Ngao coal field 113
4.8	Semi-quantitative XRD data of sediment samples from Mae Moh coal field (%) 122
4.9	Semi-quantitative XRD data of sediment samples from Chiang Muan coal field (%) 124
4.10	Semi-quantitative XRD data of sediment samples from Mae Teep coal field (%) 125
4.11	Semi-quantitative XRD data of sediment samples from Wang Nua coal field (%) 126
4.12	Semi-quantitative XRD data of selected coal samples from Mae

Moh, Chiang Muan, Mae Teep, Wang Nua. and Ngao coal field (%)	127
4.13 Geochemical analysis of major oxide of Mae Moh coal field	142
4.14 Geochemical analysis of trace elements of Mae Moh coal field	146
4.15 Selected geochemical associations of elements	149
4.16 Geochemical analysis of major oxide of Chiang Muan coal field	153
4.17 Geochemical analysis of trace elements of Chiang Muan coal field	156
4.18 Geochemical analysis of major oxide of Mae Teep coal field.	160
4.19 Geochemical analysis of trace elements of Mae Teep coal field	162
4.20 Geochemical analysis of major oxide of Wang Nua coal field	166
4.21 Geochemical analysis of trace elements of Wang Nua coal field	166
4.22 Geochemical analysis of major oxide of Ngao coal field	170
4.23 Geochemical analysis of trace elements of Ngao coal field	170
4.24 $\delta^{34}\text{S}$ of coal from Mae Moh coal field	196
4.25 $\delta^{34}\text{S}$ of pyrite and gypsum from Mae Moh coal field	197
4.26 $\delta^{34}\text{S}$ of coal from Chiang Muan coal field, Mae Teep coal field, Wang Nua coal field, and Ngao coal field	197
4.27 $\delta^{34}\text{S}$ of pyrite and gypsum from Chiang Muan coal field	199
4.28 The $\delta^{13}\text{C}$ and $\delta^{18}\text{O}$ values of shells from the Mae Moh coal field	207
4.29 The $\delta^{13}\text{C}$ and $\delta^{18}\text{O}$ values of shells from the Chiang Muan coal field	209
4.30 The $\delta^{13}\text{C}$ and $\delta^{18}\text{O}$ values of shells from the Wang Nua coal field	211
4.31 The carbon, hydrogen, nitrogen, and sulfur in sediment and coal	

	samples from Mae Moh coal field	220
4.32	The carbon, hydrogen, nitrogen, and sulfur in sediment and coal samples from Chiang Muan coal field	221
4.33	The carbon, hydrogen, nitrogen, and sulfur in sediment and coal samples from Mae Teep coal field	222
4.34	The carbon, hydrogen, nitrogen, and sulfur in coal samples from Wang Nua and Ngao coal field	222
5.1	Average semi-quantitative XRD analysis result of sediment samples from Mae Moh, Chiang Muan, Mae Teep, and Wang Nua coal field (%)	229
5.2	Average geochemical analysis results of major oxide of Mae Moh, Chiang Muan, Mae Teep, Wang Nua, and Ngao coal field (%)	230
5.3	Average geochemical analysis results of trace elements of Mae Moh, Chiang Muan, Mae Teep, Wang Nua, and Ngao coal field (ppm)	231

LIST OF ILLUSTRATIONS

Figures

1.1	Map showing the distribution of the Cenozoic basin of Thailand	2
1.2	Cenozoic basins in northern Thailand	3
1.3	Tectonic map of central-east Asia illustrating 'Extrusion' model and its relationship with Cenozoic structures in the region. Number in white arrow indicate the relative order in which certain continental block were extruded toward the southeast	9
1.4	(A) Three successive stages (I to III and IV is an interpretation) of extrusional model experiment with plasticine (plain view). Right hand side free is applied. The rigid block is modelled as India. 1 is taken as the Indochina-SE Asian Block, 2 as south China. F1 is compared to the Red River Fault, F2 to the Altyn-Tagh Fault, A to the Andaman Sea and B to the South China Sea. (B) Cretaceous palaeomagnetic data from SE Asia. (C) Palaeogeographic reconstruction of SE Asia in the Late Cretaceous before upward moving of India. The gap is the crustal shortened area	11
2.1	Geological map of the Mae Moh basin	29
2.2	Stratigraphic sequence of the Mae Moh coal field	33
2.3	Stratigraphic sequence of the Q zone coal of Mae Moh coal field	36
2.4	Stratigraphic sequence of the K zone coal of Mae Moh coal field	39
2.5	Stratigraphic sequence of the J zone coal of Mae Moh coal field	41
2.6	Stratigraphic sequence of the J1 zone coal of Mae Moh coal field	43
2.7	Lithostratigraphy of Mae Moh basin	46

2.8	Schematic stratigraphic section of Mae Moh Group with magnetic polarity time scale	49
2.9	Geological map of the Chiang Muan basin	51
2.10	Stratigraphic column of Chiang Muan coal field	54
2.11	Schematic stratigraphic section of Chiang Muan Formation with magnetic polarity time scale	59
2.12	Schematic stratigraphic section of Chiang Muan Formation with magnetic polarity time scale	60
2.13	Geological map of the Mae Teep basin	62
2.14	Stratigraphic column of Mea Teep coal field	65
2.15	Geological map of the Ngao basin	68
2.16	Stratigraphic column of Ngao coal field	70
2.17	Geological map of the Wang Nua basin	72
2.18	Stratigraphic column of Wang Nua coal field	75
3.1	A partial schematic stratigraphic succession of Mae Moh coal field, showing stratigraphic levels of the samples collected	78
3.2	A partial schematic stratigraphic succession of Q zone coal (A) and K zone coal (B) of Mae Moh coal field, showing stratigraphic levels of the samples collected	79
3.3	A partial schematic stratigraphic succession of J zone coal of Mae Moh coal field, showing stratigraphic levels of the samples collected	80

3.4	A partial schematic stratigraphic succession of Chiang Muan coal field showing stratigraphic levels of samples collected	83
3.5	A partial schematic stratigraphic succession of Mae Teep coal field, showing stratigraphic levels of samples collected	85
3.6	The study area of Wang Nua pit at grid reference 627123, Sheet Wang Nua	86
3.7	A partial schematic stratigraphic succession of Wang Nua pit, showing stratigraphic levels of the samples collected and photograph	87
3.8	The study area of Ngao pit at grid reference 084776, Sheet Ngao	88
3.9	The Photograph of Ngao pit, showing coal under gravel at Ban Heang Nua, Ngao District, Lampang Province	89
3.10	Apparatus for coal combustion	99
3.11	The vacuum line for the preparation of sulfur dioxide	101
4.1	Diagram of coal samples plotted between moisture/ash, moisture/volatile matter, and moisture/fixed carbon	118
4.2	Diagram of coal samples plotted between moisture/ash, volatile matter/ash, and fixed carbon/ash	119
4.3	Diagram of coal samples plotted between carbon/ash, hydrogen/ash, and sulfur/ash	120
4.4	The graph of major oxide of Al-Fe-Ca-Si from Mae Moh coal field with lithologic column (not in scale)	143
4.5	The graph of major oxide of K-Mg-Na-S from Mae Moh coal field with lithologic column (not in scale)	144
4.6	The graph of trace elements of V-Cr-Co-Cu from Mae Moh coal field	

	with lithologic column (not in scale)	147
4.7	The graph of trace elements of Zn-Ba-Pb-Ni-As-Zr from Mae Moh coal field with lithologic column (not in scale)	148
4.8	Trace elements in common rock types	151
4.9	The graph of selected major and trace elements of Mae Moh coal field with lithologic column (not in scale)	152
4.10	The graph of major oxide of Chiang Muan coal field with lithologic column (not in scale)	154
4.11	The graph of trace elements of V-Cr-Ni-Cu-Ba-Pb from Chiang Muan coal field with lithologic column (not in scale)	157
4.12	The graph of trace elements of Co-Zn-Zr from Chiang Muan coal field with lithologic column (not in scale)	158
4.13	The graph of major oxide of Mae Teep coal field with lithologic column (not in scale)	161
4.14	The graph of trace elements of V-Cr-Co-Cu-As-Zr-Ba from Mae Teep coal field with lithologic column (not in scale)	163
4.15	The graph of trace elements of Zn-Pb-Ni from Mae Teep coal field with lithologic column (not in scale)	164
4.16	The graph of major oxide of Wang Nua coal field with lithologic column (not in scale)	167
4.17	The graph of trace elements of Wang Nua coal field with lithologic column (not in scale)	168
4.18	The graph of selected major element of Fe-S and trace elements of Ni-Zn-As-Pb from Mae Moh coal field with lithologic column	

(not in scale)	172
4.19 Photomicrograph showing association of alginite (<i>Pila</i> type-long yellowish and lamaginite-short greenish yellow) in K3 coal seam under oil immersion and fluorescenced	184
4.20 Photomicrograph showing association of cutinite in K3 coal seam under oil immersion and fluorescenced	184
4.21 Photomicrograph showing alginite (<i>Botryococcus</i> sp.) in J6 coal seam from Mae Moh coal field under oil immersion and fluorescenced	186
4.22 Photomicrograph showing diatom in J6 coal from Mae Moh coal field under plane light (a) and cross polarizer (b)	186
4.23 Photomicrograph showing densinite and texto-ulminite in I coal from Mae Moh coal field in plane light (a) and cross polarizer (b)	187
4.24 Photomicrograph showing densinite and texto-ulminite in Lower split coal seam from Chiang Muan coal field in plane light (a) and cross polarizer (b)	187
4.25 Photomicrograph showing densinite and texto-ulminite in Upper coal seam 1 (U1) from Chiang Muan coal field in plane light (a) and cross polarizer (b)	190
4.26 Photomicrograph showing densinite in coal from Mae Teep coal field in plane light (a) and cross polarizer (b)	190
4.27 Photomicrograph showing sporinite in coal from Mae Teep coal field under oil immersion and fluorescenced (a) the sample was cut paralleled bed (b) the sample was cut perpendicular bed	192
4.28 Photomicrograph showing sporinite in coal from Wang Nua coal	

	field under oil immersion (a) and fluoresced (b)	192
4.29	Photomicrograph showing semifusinite in coal from Ngao coal field in plane light (a) and cross polarizer (b)	194
4.30	The sulfur in coal and pyrite from Mae Moh and Chiang Muan coal field related to the different sources	201
4.31	The total sulfur and organic sulfur in coal from Mae Moh and Chiang Muan coal field related to the major source	202
4.32	Graph of sulfur isotope values and sulfur content of total sulfur in coal from Mae Moh coal field	204
4.33	Graph of sulfur isotope values and sulfur content of total sulfur in coal from Chiang Muan coal field	205
4.34	The plot of stable carbon and oxygen isotope of 30 shell samples from Mae Moh coal field.	208
4.35	The plot of stable carbon and oxygen isotope of 14 shell samples from Chiang Muan coal field	210
4.36	The plot of stable carbon and oxygen isotope of 12 shell samples from Wang Nua coal field	212
4.37	Plot of carbon isotope compositions and oxygen isotope compositions of shell from Mae Moh coal field (30 samples), Chiang Muan coal field (14 samples), and Wang Nua coal field (12 samples). In the rectangular area show Tertiary marine isotope composition from Keith and Weber (1964)	214
4.38	The graph of stable carbon isotope versus stable oxygen isotope of gastropod from Mae Moh coal field correlated with the lithologic zone	216

4.39	The graph of stable carbon isotope versus stable oxygen isotope of gastropod from Chiang Muan coal field	217
4.40	The graph of stable carbon isotope versus stable oxygen isotope of gastropod from Wang Nua coal field	218
4.41	Plot of percent weight equivalence of carbon versus percent weight equivalence of sulfur from Mae Moh (101 samples), Chiang Muan (32 samples), Mae Teep (42 samples), Wang Nua (2 samples), and Ngao coal fields (1 sample). Regions enclosed by dashed line associate normal marine sediments	225
5.1	Correlation of paleomagnetic data and marine incursion events between Mae Moh and Chiang Muan coal fields. Please notice they are not the same depth scale	243
