ACKNOWLEDGEMENTS

First of all, the author wishes to express her deep appreciation to Associate Professor Dr. Jerapong Tontrakoon for all supports and encouragement throughout this project.

I would also like to thank my thesis committee members, Professor Dr. Tawee Tunkasiri, Associate Professor Dr. Gobwute Rujjanagul, Assistant Professor Dr. Kingkeo Siriwitayakorn, Assistant Professor Dr. Sripen Towta and Dr. Somnuk Sirisoonthorn for their interesting, valuable advice and for devoting their time to serve as members of the Examining Committee.

Honest thanks and gratefulness are given to Ministry of University Affairs and the Graduate School of Chiang Mai University for granting a research fund. I also wish to extend my thanks and appreciation to Srinakharinwirot University, my future employer, for the scholarship to further my study.

The author is also grateful to Dr. Wim Nhuapeng and Dr. Kamonpan Pengpat for their helpful advice, comments and suggestions.

Special personal acknowledgements are given to Dr. Anuson Niyompan and Miss Rungnapa Tipakontitikul for their help in operating the X-ray diffractometer.

Thanks are also given to my friends, in particular, Miss Dungpon Leksawat, Miss Wandee Thamjaree, Miss Wandee Onreabroy, Mrs. Chumpulnuch Poochmak and Miss Uraiwan Intatha for their help and mental support throughout the

period of my study. Profound thanks are also conveyed to all other members of the Electro-ceramic Research Laboratory for their numerous assistance and to all members of the Physics staff for their help and inspiration.

Lastly and most of all, the author is indebted to her family for their tender love, care and endless encouragement which has enabled her to succeed in this doctoral programme.
