ACKNOWLEDGEMENTS

I would like to express my sincere thanks to my advisor, Associate Professor Dhirawat Jotikasthira, for his helpful guidance, valuable advice, a proof of this thesis, and encouragement throughout the study.

I also would like to express my gratitude to my co-advisors, Associate Professor Dr. Suttichai Krisanapakornkit, for his initial encouragement in directing me towards the study of glycosaminoglycans in gingival crevicular fluid during orthodontic movement. My deep appreciation is for Associate Professor Dr. Prachya Kongtawelert and Assistant Professor Dr. Siriwan Ong-chai for providing useful suggestions and guidance in HA analysis.

I am grateful to Dr. Nitaya Jotikasthira for her assistance and experience in examining all clinical parameters (gingival and plaque indices) in this study.

My sincere appreciation is expressed to Mr. Akanit Itthiarbha for his assistance, experience, and skilful supervision in HA analysis by ELISA (Enzyme-linked Immunosorbent Assay). I wish to express my gratitude to the Department of Biochemistry, Faculty of Medicine and the Dental Research Equipment Center, Faculty of Dentistry, Chiang Mai University, for facilitating equipment and work place.

My special thanks are also extended to all staffs of the Department of Orthodontics, Faculty of Dentistry, Chiang Mai University, for their suggestions and spirits. I would like to express my appreciation to Mr. Nikom Jaito for his shared advice, assistance, and good cooperation in this study. In addition, I gratefully acknowledge all of the volunteers for their patience and willingness to take part in this study.

Last but not least, I am deeply indebted to everyone in my family, who always give love, support, and encouragement. With love and respect on my mind, I would like to dedicate my thesis to my parents who have been teaching me that perseverance is necessary to overcome any obstacles in the life.
