## ACKNOWLEDGEMENTS

First and foremost, I would like to express my profound gratitude to my advisor, Associate Professor Dr. Kom Sukontason, for his guidance and wisdom throughout my study. Without his input, I would never have made it through this program.

My deep appreciation is also to my co-advisors, Associate Professor Dr. Kabkaew L. Sukontason and Associate Professor Dr. Pongsak Mahanupab, for their kindly assistance, valuable advice during my thesis work and for their review of this thesis. Another advisory committee Dr. Piyapong Unpunyo, head of the Anatomical Pathology Section of Lampang provincial hospital, is gratefully acknowledged.

I would like to thank Miss Jinjuta Chaisri, Mrs. Nongnuch Konyu, Mr. Sthaporn Srimungmoon, Mrs. Budsabong Kuntalue, Mrs. Natchanart Tichug and Mr. Somsak Piangjai for their unforgettable help. The generous support of all department officers will be memorized also. In addition, I would like to thank all the other parasitology graduate students; without you it would not have been as much fun.

My deepest gratefulness is to my beloved family for providing continual inspiration for my higher education and their love that has greatly assisted this endeavor.

Finally, special thank is extended to Department of Parasitology, Department of Pathology, Faculty of Medicine and the Science and Technology Service Center, Chiang Mai University for supplying assistance and equipment for this study.

Rungkanta Methanitikorn
