

## Table of contents

	Page
Acknowledgements	iii
Thai abstract	iv
English abstract	vi
Table of contents	viii
List of tables	x
List of illustrations	xi
Abbreviations and Symbols	xii
CHAPTER 1 Introduction	1
1.1 Methamphetamine in Thailand: need for a methodology for drug characterization techniques to help identify drug trafficking networks.	1
1.2 Drug Characterization of Methamphetamine Pills: a scientific tool to help identify drug trafficking networks.	1
1.3 Objective of the study	2
1.4 Scope of the study	3
CHAPTER 2 Literature review	4
2.1 The Amphetamines	4
2.1.1 Background	4
2.1.2 Patterns of use	5
2.1.3 Medical Aspect of methamphetamine abuse	6
2.1.4 Overview of illicit methamphetamine problems in Thailand	7
2.1.5 Manufacture of methamphetamine in Thailand	8
2.2 Related drug characterization study review	9
CHAPTER 3 Materials and Methods	16
3.1 Apparatus	16
3.2 Materials	16
3.3 Methods	17

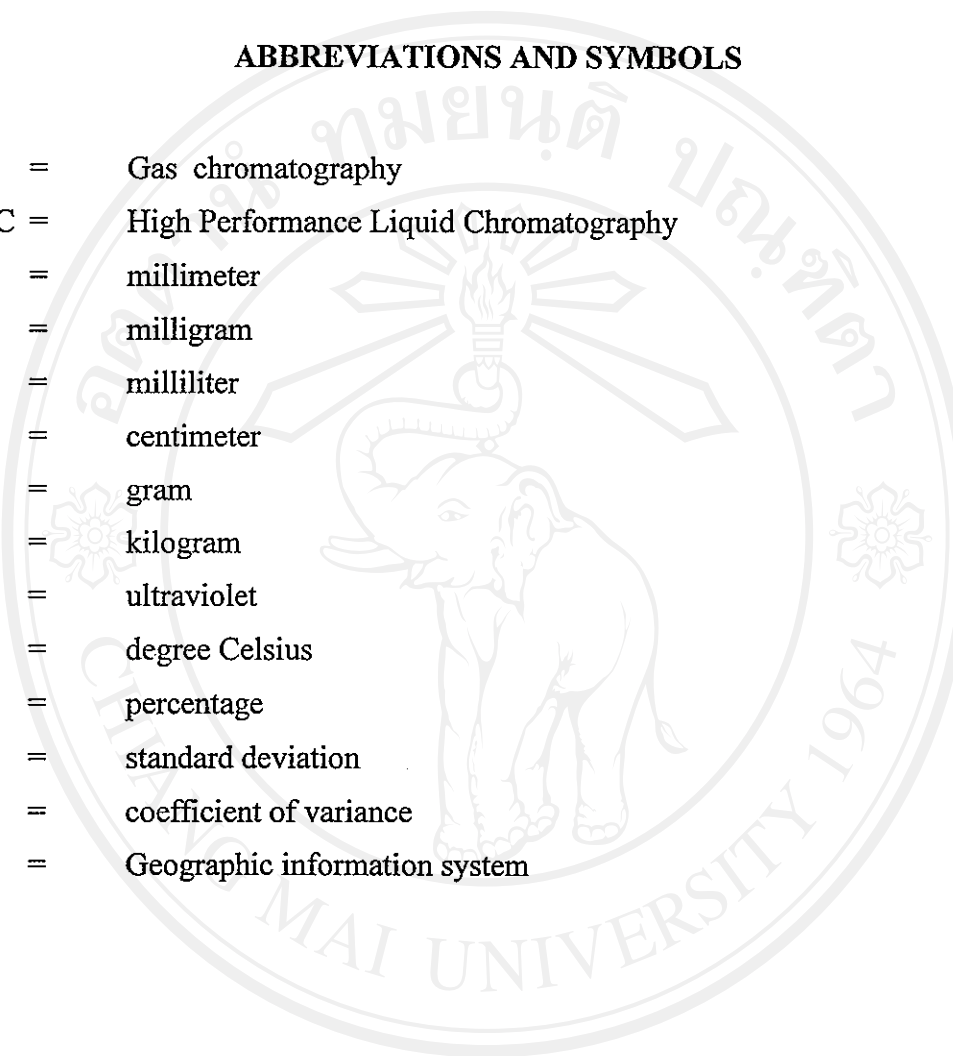

CHAPTER 4 Results	21
CHAPTER 5 Discussion	37
CHAPTER 6 Conclusions	45
REFERENCES	48
APPENDIX A Drug trafficking groups	53
APPENDIX B Production of tablets	58
APPENDIX C Specification of Methamphetamine	60
APPENDIX D	
1. Disintegration data of methamphetamine pills studied	61
2. Physico-chemical data of methamphetamine pills studied	62
3. Results from multiple comparison analysis of data using Tukey HSD test	116
CURRICULUM VITAE	117

### List of tables

Table	Page
1 Physical properties of methamphetamine pills seized during October 2002-February 2003 classified by logos	23
2 Chemical properties of methamphetamine pills seized during October 2002-February 2003 classified by logos	24
3 Physical properties of methamphetamine pills seized during October 2003-May 2004 classified by logos	25
4 Chemical properties of methamphetamine pills seized during October 2003-May 2004 classified by logos	26
5 ANOVA analysis of the physical and chemical properties of the methamphetamine pills studied (* $p < 0.05$ )	27
6 ANOVA analysis of the study on diameter of the methamphetamine pills studied (* $p < 0.05$ )	28
7 The disintegration time of methamphetamine pills	29
8 The dissolution time of methamphetamine pills at the time intervals	31
9 Data for recoveries of dyes in methamphetamine tablets	32
10 Contents (ppm) of dyes in methamphetamine tablets for orange colour	33

### List of Illustrations

Figure	Page
1 Chemical structure of methamphetamine	5
2 The colour index chart applied from CARAN d' ACHE, Switzerland	18
3 The various methamphetamine logos in samples collected	22
4 The picture of methamphetamine tablet in a basket rack assembly supporting cylinder glass tube of disintegration apparatus before operation	28
5 The picture of methamphetamine tablet after 5 minute of Disintegration test	28
6 % methamphetamine content which was dissolved from methamphetamine pills with wY, wy and WY logo against the time interval	31
7 Regression lines illustrate the relationship between the concentration of standard sunset yellow FCF, tartrazine and ponceau 4R and peak areas	33
8 Chromatogram of dyes	33
9 A picture showed one set of samples having identical physical and chemical properties was found in two different districts	35
10 Distribution pictures of methamphetamine pills using GIS to draw the picture classified by logos	36
11 Map of Shan state	56
12 Known drug refineries in Shan state	57

**ABBREVIATIONS AND SYMBOLS**The background of the page features a large, faint watermark of the Chiang Mai University logo. The logo is circular and contains an elephant standing in the center, with a traditional Thai lamp (Lampang) above its head. The text 'MAI UNIVERSITY 1964' is written around the bottom edge of the circle, and Thai script is visible at the top.

GC	=	Gas chromatography
HPLC	=	High Performance Liquid Chromatography
mm	=	millimeter
mg	=	milligram
ml	=	milliliter
cm	=	centimeter
gm	=	gram
kg	=	kilogram
UV	=	ultraviolet
°C	=	degree Celsius
%	=	percentage
SD	=	standard deviation
CV	=	coefficient of variance
GIS	=	Geographic information system
