## LIST OF TABLES

Table	Page
4.1. Number (percentage) of participants by their characteristics under individual warning conditions for <i>Paranol</i>	58
4.2. Number (percentage) of participants by their characteristics under individual warning conditions for <i>Parachlor</i>	59
4.3. Mean of clarity in high vs. low warning conspicuousness in <i>Paranol</i> and <i>Parachlor</i> drug advertisements	60
4.4. Mean and standard deviation, minimum and maximum scores of warning recall by warning conspicuousness and mode of transmission	65
4.5. Analysis of covariance of warning recall by warning conspicuousness and mode of warning transmission, <i>Paranol</i> drug advertisement	66
4.6. Analysis of covariance of warning recall by warning conspicuousness and mode of warning transmission, <i>Parachlor</i> drug advertisement	66
4.7. Mean and standard deviation, minimum and maximum scores of warning recognition by warning conspicuousness and mode of transmission	70

Table	Page
4.8. Analysis of covariance of warning recognition by warning conspicuousness and mode of warning transmission, <i>Paranol</i> drug advertisement	71
4.9. Analysis of covariance of warning recognition by warning conspicuousness and mode of warning transmission, <i>Parachlor</i> drug advertisement	71
4.10. Mean and standard deviation, minimum and maximum scores of risk perception by warning conspicuousness and mode of transmission	74
4.11. Analysis of covariance of risk perception by warning conspicuousness and mode of warning transmission, <i>Paranol</i> drug advertisement	75
4.12. Analysis of covariance of risk perception by warning conspicuousness and mode of warning transmission, <i>Parachlor</i> drug advertisement	75
4.13. Number (percentage) of participants by their characteristics under individual warning conditions for <i>Paranol</i>	79
4.14. Number (percentage) of participants by their characteristics under individual warning conditions for <i>Parachlor</i>	80
4.15. Mean of clarity in high vs. low warning conspicuousness in <i>Paranol</i> and <i>Parachlor</i>	81

Table	Page
4.16. Mean and standard deviation, minimum and maximum scores of warning recall by warning conspicuousness, warning specificity, and number of warning statement	86
4.17. Analysis of covariance of warning recall by warning conspicuousness, warning specificity, and number of warning statement within warning specificity, <i>Paranol</i> drug advertisement	87
4.18. Analysis of covariance of warning recall by warning conspicuousness, warning specificity, and number of warning statement within warning specificity, <i>Parachlor</i> drug advertisement	88
4.19. Mean and standard deviation, minimum and maximum scores of warning recognition by warning conspicuousness, warning specificity, and number of warning statement	92
4.20. Analysis of covariance of warning recognition by warning conspicuousness, warning specificity, and number of warning statement within warning specificity, <i>Paranol</i> drug advertisement	93
4.21. Analysis of covariance of warning recognition by warning conspicuousness, warning specificity, and number of warning statement within warning specificity, <i>Parachlor</i> drug advertisement	94

Table	Page
4.22. Mean and standard deviation, minimum and maximum scores of risk perception by warning conspicuousness, warning specificity, and number of warning statement	98
4.23. Analysis of covariance of risk perception by warning conspicuousness, warning specificity, and number of warning statement within warning specificity, <i>Paranol</i> drug advertisement	99
4.24. Analysis of covariance of risk perception by warning conspicuousness, warning specificity, and number of warning statement within warning specificity, <i>Parachlor</i> drug advertisement	100

## LIST OF ILLUSTRATIONS

Figure	Page
2.1. Stages of information processing	19
2.2. The multiple-store model of memory: the three storage systems	20
2.3. Conceptual framework	34
3.1. Factorial design of experiment 1	38
3.2. Unbalanced nested-factorial design of experiment 2	51
4.1. Mean warning recall for high and low conspicuousness by mode of transmission: <i>Paranol</i> drug advertisement	67
4.2. Mean warning recall for high and low conspicuousness by mode of transmission: <i>Parachlor</i> drug advertisement	67
4.3. Mean warning recognition for high and low conspicuousness by mode of transmission: <i>Paranol</i> drug advertisement	72
4.4. Mean warning recognition for high and low conspicuousness by mode of transmission: <i>Parachlor</i> drug advertisement	72
4.5. Mean risk perception for high and low conspicuousness by mode of transmission: <i>Paranol</i> drug advertisement	76
4.6. Mean risk perception for high and low conspicuousness by mode of transmission: <i>Parachlor</i> drug advertisement	76

Figure	Page
4.7. Mean warning recall for high and low warning conspicuousness by number of warning statement: <i>Paranol</i> drug advertisement	88
4.8. Mean warning recall for high and low conspicuousness by number of warning statement: <i>Parachlor</i> drug advertisement	89
4.9. Mean warning recognition for high and low conspicuousness by warning specificity: <i>Paranol</i> drug advertisement	94
4.10. Mean warning recognition for high and low conspicuousness by warning specificity: <i>Parachlor</i> drug advertisement	95
4.11. Mean risk perception for general and specific warning by warning conspicuousness: <i>Paranol</i> drug advertisement	101
4.12. Mean risk perception for general and specific warning by warning conspicuousness: <i>Parachlor</i> drug advertisement	101
