ACKNOWLEDGEMENT

I wish to express my deepest gratitude and appreciation to Assoc. Prof. Dr. Ampai Panthong, my thesis advisor for her special efforts, unforgettable support, excellent encouragement, and a very kind advice in my writing this thesis. This thesis would not have been a complete success without her guidance.

I am greatly indebted to all staff in Department of Pharmacology, Faculty of Medicine, Chiang Mai University, especially Assoc. Prof. Dr. Duangta Kanjanapothi and Asst. Prof. Dr. Tawat Taesotikul, my thesis co-advisors, for their devotion, enthusiastic teaching and suggestions during carrying out this research.

Special gratitude to Professor W.C. Taylor for his kind suggestion and improvement of the English language of this thesis.

Thankfulness for help and valuable guidance are extended to all staff members of the Chulabhorn Research Institute at Chiang Mai University.

I also wish to express my thanks to all my friends in the Pharmacology Laboratory for their kind assistance, special support, encouragement and memorable friendship.

Thanks are also due to the Higher Education Development Project: Postgraduate Education and Research Program in Chemistry (PERCH) and Prof. Dr. Vichai Reutrakul for providing financial support.

Finally, I am especially grateful to all members of my family, who have been remarkably supportive and extremely helpful, and for their understanding, emotional assistance, and encouragement.

Siriporn Somja
