ACKNOWLEDGEMENTS

This thesis is submitted as the final part of a Program of Master of Arts in Sustainable Development at the Regional Center for Social Science and Sustainable Development (RCSD), Faculty of Social Sciences, Chiang Mai University. The research was carried out in two villages, namely A Rang and A Ka, in Thua Thien Hue province, central Vietnam, where the Forest Land Allocation program has been implemented.

This thesis would not have been possible without the assistance of many individuals and institutions. From the bottom of my heart, I am grateful to Dr. Chusak Wittayapak, my thesis advisor and chairman of my thesis examining committee, for his excellent guidance, inestimable support, encouragement, and understanding throughout the whole duration of my study, particularly during the process of implementation and completion of this research. His moral support and unreserved cooperation will be ever-existing in my memory. I would also like to acknowledge the inestimable support from my committee members, Professor Dr. Anan Ganjanapan, Dr. Louis Lebel, and Ajarn Ekamol Saichan (proposal examining committee), who kindly gave me many valuable comments and suggestions for the preparation of the proposal, field work and writing of this thesis.

I also would like to express my appreciation to all lecturers: Dr. Chayan Vaddhanaphuti, Dr. Pinkaew Laungaramsri, Professor Dr. Yos Santasombat, and Ajarn Phrek Gypmantasiri for instructing interesting and useful lectures and for their kind help. Sincere thanks go to all committee members, as well as staff of the RCSD for their whole-hearted help and kindness during my study period.

I would like to express my gratitude to my donor, the Okumenisches Studienwerk e.V. (OSW), presently called the Evangelischer Entwicklungsdienst e. V. (EED), especially Dr. Konrad Itondo, Ms. Anna Heizn, Mrs. Martina Munann, Dr. Rudolf Ficker, and Mrs. Sabila Raspe. My study would not have been possible

without their generous financial support. I extend my heartfelt thanks to Dr. Tran Van Minh, Rector of Hue University of Agriculture and Forestry and Dr. Duong Viet Tinh, Dean of Faculty of Forestry for their invaluable help and facilitation, which contributed importantly to my study. I would also like to express my sincere thanks to the representatives of the Khe Tre State Forest Enterprise, Nam Dong Forest Protection Unit, and Mr. Ho Van Rai, Chairman of Thuong Quang Commune People's Committee, who fully cooperated in the collection of information, especially Mr. Le Hong Viet, staff of Khe Tre State Forest Enterprise, accompanied me on my field work and assisted me throughout my time in the villages. I am deeply indebted to the villagers who were patient and kindly answered my questions during field research, especially Mr. Ho Van Chinh, the headman of A Rang village and Mr. Ho Van Dy, the headman of A Ka village.

I am very much delighted to pay thanks for the warm and cordial friendships of my classmates (Anh, Boundeth, Chen Fye, Seng Maw, Sayaka, Trung, and Van) and all of the Vietnamese students from the RCSD (Le, Thuy, Trinh, Phuong, Diem), the Multiple Cropping Center (MCC), the Agronomy Faculty, the Sciences Faculty, Chiang Mai University, and particularly Chen Fye, who corrected the English grammar of my thesis before examination, Daniel Powell, who edited the English grammar for the final version of my thesis, and Phatcharin Bualoi-Social Sciences Faculty's student, who translated the abstract into Thai. Their kind cooperation in study and other activities are unforgettable. I also would like to take this opportunity to acknowledge to Vietnamese people abroad for their genuine helps during my study in Chiang Mai.

Last but not least, I would like to thank my mother, my wife, my son, and my younger sister and brothers, who always support and encourage me to pursue my academic goals. Particularly, I would like to dedicate this thesis to my lovely wife, Mrs. Tran Thi Thuy Hang and my son, Mr. Hoang Huy Tu and express my deepest gratitude to them. Without their love, sacrifice, encouragement and support, my study would have been impossible.

Hoang Huy Tuan
