ACKNOWLEDGEMENTS

I would like to express my deepest sense of appreciation and gratitude to my thesis advisor, Associate Professor Dr. Yuwadee Peerapornpisal for her many suggestions, her guidance and continual encouragement, and my deep thankfulness is also expressed to Professor Dr. Richard W. Castenholz, Center for Ecology & Evolutionary Biology, Department of Biology, University of Oregon, USA, for his interest, advice, recommendations and consultation throughout this thesis and for kindly allowing the use of his laboratory facility during the work on molecular analysis between January and August 2004.

I also give my gratitude to Associate Professor Dr. Somboon Anuntalabhochai for his helpful recommendations, his consultation and valuable suggestions about molecular biology techniques, Associate Professor Dr. Somporn Choonluchanon, Dr. Aparat Mahakhant and Lecturer Dr. Chitchol Phalaraksh for their kind supervision, provision of reading proposals and discussions for improvement throughout this thesis work.

I am deeply grateful to Lecturer Dr. Panmuk Vatcharapiyasophon and Lecturer Dr. Wasu Pathom-aree for their valuable suggestions, their consultation, the provision of reading proposals and their helpful comments on this thesis.

I sincerely thank Dr. Tracy B. Norris and Ms. Julie Toplin, Center for Ecology & Evolutionary Biology, Department of Biology, University of Oregon, for their help, advice and recommendations regarding the molecular work.

I sincerely thank Dr. Pranee and Prof. Suthat Fucharoen, Thalassemia Research Center, Institute of Science and Technology for Research and Development and Institute of Molecular Biology and Genetics, Mahidol University, for Bio-Rad Dcode DGGE system used in this study.

Thanks to Dr. Supranee Sitthiphrom, Dr. Ruttaporn Chundet, Dr. Supuk Mahanthanapak and all members of the Molecular Biology Laboratory for all their

assistances and the many suggestions providing me. Thanks to all members of the Applied Algal Research Laboratory (AARL), Department of Biology, Faculty of Science, Chiang Mai University for all their help on our field trips.

I wish to thank Lecturer Russell Kirk Hollis for final proof-reading, editing comments and suggestions.

I wish to acknowledge the financial support from the Royal Golden Jubilee Ph.D Program (PHD/0087/2544) and the Thailand Research Fund (BGJ4680015).

Finally, I am deeply indebted to my parents and members of my family for their love and encouragement.

Udomluk Sompong
