## ACKNOWLEDGEMENT

Formost I would like to thank my supervisors. I owe special thanks to Associate Professor Saowapa Sonthichai for proposing an interesting thesis title and her great support and encouragement over the last two years. I am very grateful for Dr. Beaver's guidance and great support throughout this study. His suggestions inspired my curiosity. I wish to thank Dr. Anthony I. Cognato, Texas A&M University, for his US-NSF grant (DEB-0328920) that supported this study and his review. Another person I wish to thank is, Dr. Chaweewan Hutacharearn, who spared her time to read and comment on this thesis .

I wish to thank the Biology Department of Chiang Mai University for a supporting grant (Collaboration Research Network (CRN)). Also all the staff and friends, without them, this thesis could not have been completed.

I would like to thank all staff of Doi Suthep-Pui National Park, Doi Pui research station of Kasetsart University and Meteorology department at Chiang Mai International Airport for their kind cooperation.

Wantanee Puranasakul
