Title	Page
Acknowledgement	iii
Abstract (English)	iv
Abstract (Thai)	vii
List of Tables	xviii
List of illustrations	xix
Abbreviations and Symbols	xxiii
Chapter 1 Introduction	1
1.1) The role of <i>Bacillus</i> sp. in bioprocessing in enzyme production	1
1.1.1 The application of <i>Bacillus</i> sp.	1
1.1.2 The thermostable enzyme from <i>Bacillus</i> sp.	3
1.2) Proteomics	7
1.2.1 The meanings and scope of proteomics	7
1.2.2 The tools of proteomics	7
1.2.2.1 Two dimensional electrophoresis (2DE)	9
1.2.2.2 Comparative proteomics with 2DE gel image analysis	11
1.2.2.3 Protein identification	14
1.2.2.3.1 In-gel Digestion	15
1.2.2.3.2 Matrix Assisted Laser Desorption Ionisation (MALDI) principle	17

Title	Page
1.2.2.3.3 Tandem mass spectrometry (MS/MS)	18
1.2.2.3.4 Peptide Mass Fingerprinting	20
1.2.3 Two dimensional different in-gel electrophoresis (2D-DIGE)	22
1.3) Post translational modification	22
1.3.1 Thiol modification	22
1.3.2 Regulatory Roles of Thiol Modifications	26
1.3.3 Prevalence of Regulatory Thiol Modifications	29
1.4) The background of <i>Bacillus stearothermophilus</i> TLS33	31
1.5) The proteome of <i>Bacillus subtilis</i>	32
1.6) The aims of this study	34
Chapter 2 Materials and Methods	39
2.1) Materials	39
2.2) Equipment	42
2.3) Methods	43
2.3.1 Bacterial culture	43
2.3.2 Protein sample preparation	43
2.3.3 Cold Acetone/TCA (trichloroacetic acid) precipitation	44
2.3.4 Protein measurement	45
2.3.5 Bicinchonic acid (BCA) Protein Assay	45
2.3.6 Assay procedure	45
2.3.7 Bio-Rad DC Protein Assay	46

Title	Page
3.1.1 Growth Profiles of <i>B. stearotherophilus</i> TLS33 under Cold Shock	57
3.1.2 2-D PAGE of cold shock stress at different time	60
3.1.3 Protein Identification and Differential Protein Synthesis	63
3.1.4 Cold Shock Effect on Signaling Pathways of <i>B. stearotherophilus</i> TLS33	64
3.2) Stress responses of <i>B. stearotherophilus</i> TLS33	78
3.2.1 Growth profiles in stress conditions	80
3.2.2 2DE, Image analysis and protein identification	80
3.2.3 Protein synthesis and protein level profiles in response in each stress condition.	88
3.2.3.1 Protein level profiles in salt stress	88
3.2.3.2 Protein level profiles in ethanol stress	90
3.2.3.3 Protein synthesis profiles in cold stress	93
3.3) The studying on post-translational modification of AhpC or Peroxiredoxin (Prx)	96
3.3.1 Bacterial survival of <i>B. stearotherophilus</i> TLS33 under oxidative stress	96
3.3.2 2-DE analysis of <i>B. stearotherophilus</i> TLS33 cells and protein identification	97
3.3.3 Acidic shift of peroxiredoxin isoform	100

Title	Page
3.3.4 Effect of stressed time on modification of peroxiredoxin isoforms under oxidative stress	104
3.3.5 Post-translational modification by LC-MS/MS of Prx	106
3.4) Using Cy3 Maleimide for detection thiol oxidized proteins in <i>B. stearotherophilus</i> TLS33	108
3.4.1 Using Cy3 Maleimide to detect oxidative modified Protein	108
3.4.2 Protein identification and protein function classification	120
3.4.3 Protein in detoxification	122
3.5) Two dimensional differential in-gel electrophoresis (2D-DIGE) of thiol oxidized proteins	128
Chapter 4 Discussion and Conclusion	136
4.1) Discussion	136
4.1.1 Investigation protein expression at cold shock different temperatures	136
4.1.1.1 Growth profile of <i>B. stearotherophilus</i> TLS33 under cold shock	136
4.1.1.2 2DE, protein identification and protein function	137
4.1.2 Stress responses of <i>B. stearotherophilus</i> TLS33	140

Title	Page
4.1.2.1 Growth profile in individual conditions	140
4.1.2.2 2DE, Image analysis and protein Identification	141
4.1.2.3 Protein synthesis and protein level profiles in each stress condition	142
4.1.2.3.1 Protein level profiles in salt stress	142
4.1.2.3.2 Protein level profiles in ethanol stress	144
4.1.2.3.3 Protein level profile in cold stress	145
4.1.3 The studying on post-translational modification of AhpC or Peroxiredoxin (Prx)	146
4.1.3.1 Bacterial survival of <i>B. stearotherophilus</i> TLS33 under oxidative stress	146
4.1.3.2 2DE analysis of <i>B. stearotherophilus</i> TLS33 and protein identification	147
4.1.3.3 Acidic shift of Prx Isoform	147
4.1.3.4 Post-translation modification of AhpC or Peroxiredoxin (Prx)	148
4.1.4 Using Cy3 Maleimide for detection of thiol oxidized proteins in <i>B. stearotherophilus</i> TLS33	149
4.1.4.1 Using Cy3 Maleimide to detect oxidative modified protein in vivo.	149
4.1.4.2 Protein identification and protein function classification	152
4.1.5 Two-dimensional differential in-gel electrophoresis (2D-DIGE)	153

Title	Page
4.2) Conclusion	155
References	144

1. Functional proteomics and correlated signaling pathway of the thermophilic bacterium <i>Bacillus stearothermophilus</i> TLS33 under cold-shock stress	174
2. Proteomics viewed on stress response of thermophilic bacterium <i>Bacillus stearothermophilus</i> TLS 33	191
3. Bioinformatics, functional genomics and proteomics study of <i>Bacillus</i> sp.	200
4. Functional and Structural Analysis of <i>Bacillus</i> proteome	226
5. Differential Gene Expression in Proteome Level of the Thermophilic Bacterium <i>Bacillus stearothermophilus</i> TLS33 in Environmental Cold stress	260
Vita	274

LIST OF TABLES

Table	Page
2.1 SDS sample buffer composition	46
2.2 SDS PAGE	47
3.1 Protein identification of cytosolic proteins in <i>B. stearothermophilus</i>	68
3.2 Protein identification of four peroxiredoxin isoforms of <i>B. stearothermophilus</i> TLS33	98
3.3 The identities of N-terminal sequence of Prx	99
3.4 The identified thiol oxidized proteins with labeling with Cy3 Maleimide.	114
3.5 Classification of thiol oxidized proteins in <i>B. stearotheroothermophilus</i> TLS33	125
4.1 The comparisons of advantages and defects of protein visualization method	154

LIST OF ILLUSTRATIONS

Figure	Page
1.1 Schematic representation of 2D-SDS-PAGE	10
1.2 Quantitation and comparison of spot intensities	12
1.3 Protein identification with peptide mass fingerprinting	16
1.4 Schematic of MALDI Process	18
1.5 MASCOT software for protein identification	20
1.6 Chemical formulate of Cy3 and Cy5 N-hydroxy succinimide	23
1.7 The schematics of CyDye labeling of 2D-DIGE	24
1.8 Reaction scheme of Maleimide cyanide dyes	25
1.9 Formation of Reactive Oxygen Species	27
1.10 Thiol modification proteins	29
3.1 Growth profile of <i>B. stearrowthermophilus</i> TLS33 under cold shock stress at 37°C and 25°C for 2 h.	58
3.2 2-D gel patterns of cell extracts from <i>B. stearrowthermophilus</i> TLS33	59
3.3 Up- and down-regulation of expressed proteins	62
3.4 The 2-D and 3-D viewings of 8 major different proteins under cold shock	67
3.5 Activation and deactivation of signaling pathways	76
3.6 Summary of cold shock-induced proteins	77
3.7 The growth profile of <i>B. stearrowthermophilus</i> TLS33 after Salt stress	78

Figure	Page
3.8 The growth profile of <i>B. stearrowthermophilus</i> TLS33 after ethanol stress	79
3.9 The growth profile of <i>B. stearrowthermophilus</i> TLS33 after cold stress	79
3.10 2DE gel image of <i>B. stearrowthermophilus</i> TLS33 proteins in salt stress (10% w/v NaCl)	82
3.11 2DE gel image of <i>B. stearrowthermophilus</i> TLS33 proteins in 10% v/v ethanol.	83
3.12 2DE gel image of <i>B. stearrowthermophilus</i> TLS33 proteins in 25°C cold stress	84
3.13 The Scatter plot of 2DE-image analysis of salt stress of <i>B. stearrowthermophilus</i> TLS33	85
3.14 The Scatter plot of 2DE-image analysis of 10% ethanol stress of <i>B. stearrowthermophilus</i> TLS33.	86
3.15 The Scatter plot of 2DE-image analysis of 25°C stress of <i>B. stearrowthermophilus</i> TLS33	87
3.16 Synthesis and accumulation of some selected proteins in each different time of salt stress	89
3.17 Synthesis and accumulation of some selected proteins in each different times of 10% v/v ethanol stress	92
3.18 Synthesis and accumulation of some selected proteins in each different time of cold stress	94

Figure	Page
3.19 Survival percentage of <i>B. stearotherophilus</i> TLS33 after addition of different concentrations of H ₂ O ₂	96
3.20 The identities of N-terminal sequence of Prx	99
3.21 2-DE images of intracellular proteome of <i>B. stearotherophilus</i> TLS33 under oxidative stress.	101
3.22 Peroxiredoxin expression in <i>B. stearotherophilus</i> TLS33 under oxidative stress by addition of different concentrations of H ₂ O ₂	102
3.23 Hypothesis of <i>B. stearotherophilus</i> TLS33 peroxiredoxin isoforms that are modified by H ₂ O ₂	103
3.24 Peroxiredoxin expression in <i>B. stearotherophilus</i> TLS33 under oxidative stress in different stressed times	105
3.25 Collision-induced dissociation spectrum	106
3.26 The Cy3 Maleimide labeling on thiol oxidized proteins in <i>B. stearotherophilus</i> TLS 33.	110
3.27 2DE of Cy3 Maleimide labeled on thiol oxidized proteins <i>B. stearotherophilus</i> TLS 33	111
3.28 2DE age of identified thiol oxidized proteins were labeled with Cy3 Maleimide	113
3.29 The 2DE of Pro Q Diamond staining of intracellular proteins of <i>B. stearotherophilus</i> TLS33.	117

Figure	Page
3.30 The gel images of Cy3 Maleimide labeling on the intracellular protein sample with no blocking with IAM before labeling.	119
3.31 The protein spots which were visualized by Cy3 Maleimide	120
3.32 Histogram demonstrated proportion of function classification of oxidized proteins in <i>B. stearotherophilus</i> TLS33	124
3.33 Pentose phosphate pathway the up-regulated proteins which were found in 2DE-gel were shaded	124
3.34 The DIGE technique for detection thiol oxidized proteins	129
3.35 The 2D-DIGE image for 100 M H ₂ O ₂ treated <i>B. stearotherophilus</i> TLS33	130
3.36 2D-DIGE gel images of <i>B. stearotherophilus</i> TLS33 proteins at treated with H ₂ O ₂	131
3.37 The differentially expressed proteins in 2D-DIGE image involving in pentose phosphate pathway	132
3.38 The differentially expressed proteins in 2D-DIGE image involving in redox metabolism	133
3.39 The differentially expressed proteins in 2D-DIGE image involving Related to chaperone	135

ABBREVIATIONS AND SYMBOLS

g	gram
mg	milligram
ng	nanogram
ml	millilitre
M	molar
mM	millimolar
pmol	picomol
min	minute
hr	hour
rpm	round per minute
α	alpha
β	beta
μ	micro
Δ	delta
$^{\circ}\text{C}$	degree Celsius
