ACKNOWLEDGEMENT

I am profoundly acknowledged to Assoc. Prof. Dr. Jintana Siripitayananon, Dr. Robert Molloy for their encouragement, guidance and completion with my dissertation. Especially, I also wish to express my sincere gratitude to Prof. Geoffrey R. Mitchell for valuable discussions, kindly helps in technical skill, survival task and any helps when doing research at University of Reading.

I also thank Miss Montira Sriyai for the synthesis and characterization of poly(L-lactide) sample which was studied in this research and Mr. Yodthong Baimark for valuable suggestions with synthesis segmented triblock terpolymer of L-lactide (LL), ϵ -caprolactone (CL) and glycolide (G).

My thanks are due to staffs in Biomedical Polymers Research unit for their helps with all instrumental analysis involving my research.

I am indebted to the Thai Ministry of University Affairs for financial support the Ph.D. scholarship and Graduate School, Chiang Mai University for funding this research.

Finally, I am grateful to say thank you my family for their love and heartening which has enable me to be successful in my education.
